This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

EXPLANATIONS OF REGULAR STATISTICAL TABLES.

General imports.—The regular statement of imports of merchandise, by articles and countries, in this publication is what is termed the statement of *general imports*, embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse, as distinguished from special imports, which embrace imports entered for immediate consumption and withdrawals from warehouse for consumption.

The statement of *general imports* and the statement of *imports entered for consumption* for any period will differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption*. The term "*entry for consumption*" is the technical name of the import entry made at the custom-house, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion.

The values of articles imported since August 1, 1890, are governed by the provisions of section 19 of the act of June 10, 1890, which prescribes that the values of imported merchandise subject to ad valorem rates of duty shall be "the actual market value or wholesale price of such merchandise as bought and sold in usual wholesale quantities at the time of exportation to the United States in the principal markets of the country from whence imported and in the condition in which such merchandise is there bought for exportation to the United States or consigned to the United States for sale, including the value of all cartons, cases, crates, boxes, sacks and coverings of any kind, and all other costs, charges, and expenses incident to placing the merchandise in condition ready for shipment to the United States.

Domestic exports.—The regular statement of domestic exports, by articles and countries, in this publication exhibits the exports of domestic products or manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles, utensils, etc., made from imported materials. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported.

Foreign exports.—The regular statement of foreign exports, by articles, in this publication, sometimes called "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported "from warehouse" is their import value; the value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

Warehoused merchandise.—The regular statement of articles remaining in warehouse in this publication exhibits imported merchandise in bonded warehouses. This merchandise has already appeared in the statement of *general imports*. The official values of the articles therein represented are the same as the *import values*.

Tonnage tables.—In the tables of tonnage movement in American foreign trade the tonnage is stated in net tons of 100 cubic feet carrying space after the prescribed allowances are made for crew space, engine space, etc.

Weights.—In all tables published by the Bureau the ton weight is 2,240 pounds and the hundredweight is 112 pounds, unless indicated otherwise.

Customs districts.—Statements of imports, exports, and tonnage movement are shown by customs districts, which have a certain prescribed limit of territory with a port of entry. The customs districts having the port of entry with name different from that of the customs district are the following:

COMMERCE BETWEEN THE UNITED STATES AND ITS NONCONTIGUOUS TERRITORIES AND BETWEEN SAID TERRITORIES AND FOREIGN COUNTRIES.

The following tables show the commerce of the noncontiguous territories of the United States with the United States and with foreign countries for comparative periods of time. Customs collectors were not required prior to the act of April 29, 1902, to furnish statements of shipments of merchandise between the United States and its noncontiguous possessions.

Hawaii was annexed to the United States by act of Congress of July 7, 1898, and was made a Territory and customs district by act of April 30, 1900, which took effect June 14, 1900.

Porto Rico was taken possession of by the United States October 18, 1898, and was given a civil government and made a customs district by act of April 12, 1900, to take effect May 1, 1900.

The figures of the commerce between the Philippine Islands and the United States, while at present included in the general tables of foreign commerce of the United States, are also presented herewith in conjunction with the other tables of this group.

INTERNAL COMMERCE OF THE UNITED STATES.

MORRIS JACOBSON, *Internal Commerce Expert.*

JANUARY SUMMARY OF INTERNAL TRADE MOVEMENTS.

The Summary of Internal Commerce for January, 1908, includes tables exhibiting the comparative progress of trade movements in different parts of the United States for the month of the current and two or more preceding years. These statistics are gathered partly through the cooperation of commercial organizations and transportation companies, partly by compilation from authoritative trade publications, and to an increasing extent from official reports made by this and other departments of the public service. Statistics of domestic commerce on the Great Lakes, unless otherwise credited, are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

The tables which appear in this issue represent six different geographical sections, as follows: I. Commercial movements at interior centers; II. Coastwise commerce on the Great Lakes; III. Commercial movements at the North Atlantic seaboard; IV. Coastwise commerce at Atlantic and Gulf ports; V. Commercial movements in southern territory; and VI. Commercial movements on the Pacific coast. Other tables representing no particular geographical sections are: VII. Commercial movements on rivers and canals; VIII. Commércial movements of coal, coke, petroleum, and pig-iron production; IX. Ocean freight rates; and X. Changes in rail freight rates.

I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

[For tables pertaining to this section see page 1370.]

Receipts of live stock at 7 interior primary markets during January, 4,529,838 head, show a considerable increase over the figures for the preceding month as well as the corresponding 1907 and 1906 receipts of 3,864,445 and 3,886,358 head. All the markets in question show larger receipts for the month than a year ago, the increase, however, being due exclusively to the larger receipts of hogs, while cattle, calves, sheep, horses, and mules all show decreased receipts. Of the total receipts for the month, cattle constituted 761,835 head, calves 48,830 head, hogs 2,988,260 head, sheep 691,958 head, and horses and mules 38,955 head. Corresponding January, 1907, figures were, cattle 857,077 head, calves 55,743 head, hogs 2,041,106 head, sheep 861,257 head, and horses and mules 49,262 head. The number of cars used in handling this inbound movement is stated as 77,980, compared with 72,440 and 71,268 cars reported for January, 1907 and 1906.

Stocks of meat at 5 principal interior markets at the close of the month aggregated 281,259,104 pounds, an increase of over 100 million pounds over the figures for December 31, like figures for corresponding dates in 1907 and 1906 being 199,653,981 and 255,148,728 tons, all the markets in question showing considerable increases, Chicago alone showing a gain in stocks of over 40 million pounds.

Shipments of packing-house products from Chicago during the month, 213,298,123 pounds, while larger than the December, 1907, figures, mark, however, a decrease compared with the corresponding January, 1907 and 1906, shipments of 229,174,790 pounds and 257,534,955 pounds, the main decreases occurring under the heads of fresh and pickled beef, tallow and stearin, while shipments of canned beef, 7,360,200 pounds, were about 1½ million pounds in excess of the January, 1907, shipments, though less than half of the January, 1906, movement. Shipments of cured meats and hides were also larger than a year ago.

Eastbound trunk-line movements of provisions from Chicago and Chicago junction points during the first five weeks of the year, 112,386 tons, show a similar decrease both as compared with the corresponding 1907 and 1906 figures, 115,321 and 142,387 tons. The grain movement during this period, 16,320,000 bushels, compares favorably with the corresponding 1907 total of 13,627,000, though being about 8 per cent below the 1906 figures. The flour movement for the same period, 733,118 barrels, was more than 50 thousand barrels below the corresponding 1907 total, though over 9 per cent larger than the total for the first five weeks in 1906.

Grain receipts during January at 15 interior primary markets, 70,787,532 bushels, were slightly in excess of the January, 1907, receipts of 66,897,275 bushels, though below the January, 1906, figure of 73,432,986 bushels. Increased receipts as compared with the 1907 figures were reported, among others, for Chicago, Minneapolis, Duluth, and Kansas City, while smaller receipts were reported by St. Louis, Milwaukee, and Omaha. The total grain receipts were made up of 17,645,296 bushels of wheat, 28,312,725 bushels of corn, 17,207,725 bushels of oats, 6,649,789 bushels of barley, and 971,997 bushels of rye, besides 2,066,696 bushels of flaxseed which did not enter the grand total stated above. All classes of grain show larger receipts for the month than a year ago. Grain receipts at the same markets for the five months of the crop season beginning September 1, 376,545,194 bushels, were but slightly below the corresponding 1907 receipts of 378,123,877 bushels, though over 13 per cent less than the corresponding total for the 1905–6 crop season. The season receipts were lower than a year ago in the case of wheat, corn, and rye, while the receipts of oats and barley show some gains over like figures for the preceding season.

Shipments of pine lumber from the Mississippi and Wisconsin valleys for the month are reported as 47,296,924 feet, and mark a slight improvement as compared with the shipments for the preceding month, though being much below the corresponding January, 1907 and 1906, figures of 108,647,048 and 117,941,373 feet.

II.—DOMESTIC COMMERCE ON THE GREAT LAKES.

[For tables pertaining to this section see page 1378.]

Domestic shipments from all ports on the Great Lakes during the month aggregated 255,836 net tons, a quantity considerably below the corresponding totals for 1907 and 1906, 349,316 and 328,864 net tons. The freight movement during the month, which was almost entirely restricted to local movements between Lake Michigan ports, consisted mainly of shipments of soft coal, 61,233 net tons, as against 88,576 net tons shipped during January, 1907; 24,647 net tons of grain as against 35,278 net tons shipped during January of the preceding year; 17,187 net tons of flour as against 18,479 net tons; 7,972,000 feet of lumber compared with 20,974,000 feet, and 107,711 tons of miscellaneous merchandise compared with 124,213 net tons shipped during January, 1907. The vessel clearances from all points on the Great Lakes during January totaled 856 of 912,044 net tons register compared with 1,075 clearances of 1,100,505 net tons reported during January, 1907; Milwaukee reporting 180 vessels cleared of 221,153 net tons, Ludington credited with 132 clearances of 198,703, and Manitowoc with 87 vessels of 111,043 net tons register are the only three ports reporting a tonnage in excess of 100,000 net tons.

III.—COMMERCIAL MOVEMENTS AT THE NORTH ATLANTIC SEABOARD.

[For tables pertaining to this section, see page 1381.]

Live stock receipts at 4 principal Atlantic seacoast cities, Boston, New York, Philadelphia, and Baltimore, during the month of January, or first five weeks of the year, aggregated 972,186 head, compared with 718,583 head received during the same period of 1907. Of the total received during the month at the four cities named, 117,046 were cattle, 541,906 hogs, 32,598 calves, and 280,636 sheep. The increases, as compared with the returns of January of last year, are particularly heavy in the cases of sheep and hogs.

Grain and flour receipts at the above named cities for the month aggregated 18,209,092 bushels, compared with 21,841,991 and 32,830,494 bushels received at these cities during January of 1907 and 1906. Of the total given, Boston is credited with 2,032,810 bushels, New York with 7,833,580 bushels, Philadelphia with 3,340,330 bushels, and Baltimore with 5,002,372 bushels, all the cities, with the exception of Baltimore, showing considerably smaller receipts than a year ago. The wheat receipts at these cities during the month were 3,433,748 bushels as against 5,327,006 bushels recorded for January, 1907. The corn receipts aggregated 5,275,579 bushels as against 7,153,817 bushels, while the flour receipts were 1,275,986 barrels compared with 1,361,545 barrels received at these cities during January, 1907. Smaller receipts of wheat and corn are recorded for Boston, New York, and Philadelphia, while flour receipts were smaller than a year ago at all the cities named except New York. The total wheat exports, for January, from the four ports named, viz, 5,801,670 bushels, compared with 3,392,816 bushels exported during January, 1907, appear to have been larger than the quantities received, while the aggregated flour exports at the four ports for the month were 821,134 barrels for 1908 compared with 536,497 barrels for January, 1907.

IV.—COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

[For tables pertaining to this section see page 1384.]

Coastwise receipts of southern pine at New York during the month ending January 25, 22,916,790 feet, were considerably below the corresponding 1907 and 1906 figures of 31,546,021 and 47,108,506 feet, the principal losses occurring in the receipts from Fernandina, Fla., Savannah, Ga., Wilmington, N. C., and Brunswick, Ga. Receipts from Jacksonville, Fla., Charleston, S. C., and Georgetown, S. C., on the other hand, show larger figures than a year ago.

Coastwise shipping arrivals at Boston during the month comprised 704 vessels of 783,206 gross tons compared with 694 vessels of 755,571 gross tons reported for January, 1907. Of the total given, 487 vessels of 602,164 gross tons are credited to southern ports and 217 vessels of 181,042 gross tons to eastern ports. About a quarter of the coastwise arrivals and over one-half of the coastwise tonnage is represented by steamers.

V.—COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY.

[For tables pertaining to this section see page 1386.]

Sight receipts of cotton for the five months of the season beginning September 1, 8,230,354 bales, were 16 per cent below the corresponding figures for the preceding season, though about a quarter of a million bales in excess of the corresponding 1905–6 season figures. Port receipts during the same period were 6,252,826 bales compared with 7,318,599 and 5,702,805 bales received during the 1906–7 and 1905–6 seasons. Galveston, 1,736,349 bales, while still leading in the quantity of bales received, shows, however, a heavier decline from last year's receipts than the other two leading cotton ports, New Orleans and Savannah. Receipts at 29 leading interior points, for the five months, are stated as 3,592,590 bales; 5,303,559 and 4,105,342 bales having been reported for the corresponding 1907 and 1906 periods. American spinners' takings for the five months of the season are given as 2,157,344 bales, of which 56 per cent are credited to southern mills. Total American stocks ending January aggregated 1,312,824 bales compared with 1,815,637 bales and 1,589,024 bales at the end of January, 1907 and 1906.

The domestic shipments of rosin during the same period, 310,074 barrels, show a small gain over the 1906–7 figures, 293,470 barrels, though being below the corresponding 1905–6 shipments of 344,718 barrels. The foreign shipments, 103,528 barrels of spirits of turpentine and 284,663 barrels of rosin, were both heavier than a year ago. The stocks on hand, under date of January 31, of spirits of turpentine, 27,899 barrels, as well as those of rosin, 97,092 barrels, were largely in excess of the corresponding stocks held a year ago.

VI.—COMMERCIAL MOVEMENTS ON THE PACIFIC COAST.

[For tables pertaining to this section see page 1390.]

Shipments of redwood lumber from upper California during the month aggregated 16,928,635 feet compared with 33,411,576 feet shipped during January, 1907. Of the total shipments, 11,681,669 feet were directed to San Francisco Bay, 2,844,570 feet to southern California points, and 2,402,396 feet to other, including foreign destinations. The corresponding figures for January, 1907, were shipments to San Francisco Bay, 25,310,337 feet, shipments to southern California 6,014,613 feet, and shipments to other destinations 2,086,626 feet.

Arrivals of pine and fir likewise show a considerable decrease from 131,614,238 feet in January, 1907, to 84,708,107 feet in January, 1908. The arrivals of pine and fir at San Francisco Bay during the month were 48,977,926 feet compared with 78,649,549 feet during January, 1907.

Citrus fruit shipments from southern California for the first three months of the season beginning November 1 aggregated 5,612 cars, of which 4,584 cars were oranges and 1,028 cars were lemons. Corresponding movements during the 1906 season comprised 3,998 cars of oranges and 588 cars of lemons, and during the 1905–6 season, 5,409 cars of oranges and 748 cars of lemons.

Receipts of flour and grain at San Francisco during the month, 1,363,915 bushels, compared with 1,778,710 and 1,671,529 bushels received during January, 1907 and 1906. As compared with the January, 1907, figures smaller receipts are shown for barley and oats.

Domestic lumber shipments from Portland during the month totaled 6,149,450 feet as against 9,141,572 feet shipped during January, 1907; the total, including foreign shipments, for the month, 17,702,092 feet, were heavier than the total shipments during January, 1907, 12,515,569 feet.

VII.—COMMERCIAL MOVEMENTS ON RIVERS AND CANALS.

[For tables pertaining to this section see page 1394.]

Upstream traffic during January on the Monongahela River at Lock No. 1, representing the maximum upstream movement on that river, comprised 78,880 tons, of which 35,862 tons were gravel, 28,966 tons sand, and 9,869 tons iron and steel manufactures. Downstream traffic during the month at Lock No. 3, representing the maximum downstream movement on the river, 792,170 tons, composed mainly of bituminous coal, shows a considerable increase over the January, 1907, figures owing to heavier coal traffic during the month.

Arrivals by river at Cairo during the month aggregated 856 vessels of 514,806 tons compared with 462 vessels of 300,693 tons reported for January, 1907. Of the total given, 568 vessels of 367,358 tons represented a through movement, and 288 vessels of 147,448 tons a local movement. By far the greater bulk of the vessels reporting at that point, 649 vessels of 453,340 tons, were boats and barges, while the number of steamers reporting at that point was 207 of 61,466 tons.

VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, PETROLEUM, AND PHOSPHATE.

[For tables pertaining to this section see page 1397.]

The customary annual statement of bunker coal supplied to vessels at Ocean, Gulf, and Lake ports during the calendar year 1907 shows 7,114,224 gross tons supplied to vessels at Atlantic ports, 684,659 gross tons at Gulf ports, 936,291 gross tons at Pacific ports, and 2,564,471 gross tons at Lake ports. These figures include the quantities supplied to vessels engaged in the foreign as well as the coastwise trade.

January figures of coal and coke traffic for 7 leading eastern coal carrying roads, 8,554,969 tons, show a 29 per cent decrease as compared with like figures for January, 1907. The shipments of bituminous coal during the month, 6,864,577 tons, were about 24 per cent below those for January, 1907, while the coke shipments, 1,146,688 tons, show a decrease of over 53 per cent. The anthracite coal traffic over the Baltimore and Ohio and the Pennsylvania railroads, 543,704 tons, being less subject to the vicissitudes of industrial requirements, shows a relatively small decrease of 9 per cent, as compared with the January, 1907, figures. Anthracite coal shipments from eastern producing territory for the month, 5,618,339 tons, were heavier than during December, 1907, and in excess of January shipments of earlier years except those during January, 1903, when 5,964,950 gross tons were shipped.

Coal and coke traffic originating on the Pennsylvania Railroad Company's lines east of Pittsburg and Erie during the month, 3,844,923 short tons, shows a decrease of about half a million tons as compared with the total reported for December, though the coke traffic was slightly heavier than during the preceding month. Corresponding figures of coal and coke traffic for 1907 and 1906 were 5,221,350 and 5,117,963 net tons. The figures of anthracite coal traffic, 465,252 net tons, were but slightly below the corresponding 1907 and 1906 figures of 488,935 and 498,961 net tons, the heaviest relative decline appearing under the head of coke shipments.

Coal and coke shipments originating on the New York Central and Hudson River Railroad during the month, 589,176 net tons, were considerably below the January, 1907 and 1906, figures of 754,774 net tons and 890,722 net tons, and the same is true of like movements on the Pittsburg and Lake Erie Railroad and short lines, the January, 1908, total, 637,360 tons, being about one-half in size as compared with the January, 1907 and 1906, movements of 1,249,482 and 1,413,208 tons.

The estimated coke production at Connellsville, including the lower district, during the first five weeks of the year, 839,346 net tons, was about 60 per cent below the corresponding 1907 total, the number of idle ovens having increased from an average of 1,983 for the first five weeks of 1907 to 20,826, the average figure for the first five weeks of the present year. The number of cars used in shipping the product during this period was 29,473 compared with 73,682 reported for the same period in 1907.

Production of anthracite and coke pig iron during the month, 1,045,525 gross tons, shows a further decrease of operations since the recent depression set in, the corresponding 1907 and 1906 figures being 2,205,607 and 2,068,893 gross tons. The only district which shows an improvement, as compared with the December output, is the Pittsburg district, which reports a production of 305,575 gross tons for January as compared with 258,412 gross tons for December.

Runs of petroleum from wells tributary to the principal pipe lines in the Appalachian, Lima-Indiana, and Mid-continent fields during January aggregated 7,948,430 barrels, marking a slight increase of operations as compared with the December reports. Gross stocks of the reporting lines show the unusually large total of 59,490,105 barrels, while regular deliveries to consumers are stated as 7,965,019 barrels.

Coastwise shipments of crude oil from Port Arthur and Sabine, Tex., during January are given as 220,319 barrels, marking a slight increase over the low December total, though being much below the corresponding 1907 and 1906 figures of 348,134 and 407,237 barrels. The shipments of refined oil, 219,660 barrels, were considerably in excess of the corresponding 1907 and 1906 figures of 42,314 and 26,123

Digitized by Google

barrels. The total coastwise shipments of oil of all varieties, 466,785 barrels, show a decline of over 33 per cent as compared with the January, 1907, shipments and are almost 200,000 barrels less than the January, 1906, shipments. The principal destinations of these shipments appear to have been Beverly, Mass., New York, N. Y., Baltimore, Md., Bayonne, N. J., and the Delaware River stations.

IX.—CHANGES IN OCEAN FREIGHT RATES.

[For tables pertaining to this section see page 1403.]

Ocean freight rates on grain from Atlantic to principal European ports show a slight decline compared with rates published for December, 1907, though still continuing considerably higher than a year ago. Like rates from New Orleans show but slight changes, except in the case of Liverpool business, on which the rates were lower than for the preceding month as well as for January, 1907. New Orleans rates on cotton exported to Liverpool and Bremen were, on the whole, lower than during the preceding month, though above the January, 1907, quotations. The quoted rate to Hamburg, while the same as a year ago, was, however, higher than during the preceding month. New York cotton rates, while higher than a year ago, show a decline as compared with quotations for the preceding month. Baltimore rates on cotton ruled higher than a year ago, particularly on shipments to Liverpool and Bremen.

X.—CHANGES IN RAILROAD FREIGHT RATES.

[For tables pertaining to this section see page 1404.]

No changes in railroad rates were reported to the office by the Interstate Commerce Commission during the month of January, 1908.

COMPARISON OF CAR-SERVICE OPERATIONS.

A convenient index to the traffic activities of the country is found in the comparative figures of cars handled by the various car-service associations. Thirty-eight different associations report monthly the number of cars handled in their respective territories. Only in a very rough way, however, do these figures indicate the changes in volume of traffic, inasmuch as they do not, in some cases, include more than one-third of the cars actually handled at a given traffic center, and the territory under control of an association may be extended or contracted from time to time. The figures are given, nevertheless, as a convenient general gauge of increase or decrease of traffic by rail, assuming that they are made up on substantially the same basis from year to year.

[a] Formerly the Louisiana Car-Service Association.

The number of cars handled during the month by 38 reporting car-service associations, 2,418,909, shows a heavy decrease as compared with figures reported for January, 1907 and 1906, viz, 3,037,223 and 3,003,905 cars. While the operations reported, in all cases except three, were uniformly smaller than for January, 1907, the decrease appeared to have been especially heavy in the territory covered by the Pittsburg Car Service Association, which reports the number of cars handled during the month as 122,130, marking a decrease of 45 per cent as compared with January, 1907, operations. Another large decrease is reported from Philadelphia, the January, 1908, figures, 125,581 cars handled, being about 30 per cent below the corresponding January, 1907, figure. The Alabama Car Service Association likewise reports a heavy shrinkage of operations, the January, 1908, total, 47,546 cars, being 36 per cent below the January, 1907, figure.

Figures compiled by the Committee on Car Efficiency of the American Railway Association at Chicago indicate a similar situation. According to the latest bulletin of the committee, the number of idle cars of all classes, on 153 reporting roads, was 339,053 on January 22 of the present year, while the surplus at the end of October, 1907, was but 3,946 cars. As against this surplus a shortage was reported of 90,757 cars under that date, while the shortages under date of January 22 totaled only 738 cars. The largest number of idle cars for the latter date is reported by roads in the Eastern and Middle States and over 46 per cent of the surplus cars reported from these sections were of the coal, gondola, and hopper type, i. e., such as are used mainly in the transportation of coal, coke, ore, and pig iron. The situation in the Central and Western sections of the country, both North and South, to judge by the decrease in the number of idle cars since January 8, shows a slight improvement, though for the more industrial section of the country, including New England, New York, and Pennsylvania, there are as yet no signs of increasing activity in the transportation field.

I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

The territory embraced in this section extends from Minneapolis, in the Northwest, to Little Rock, in the Southwest, east as far as Buffalo, and south as far as the Ohio River. Interior traffic movements for January of succeeding years are shown by tables of live-stock receipts and shipments and comparative stocks of provisions at the most important packing-house centers; by tables of receipts and shipments of flour, grain, produce, and merchandise, and by trunk-line shipments of flour, grain, and provisions from Chicago. During the season of canal navigation, canal and rail traffic in grain, flour, and general merchandise at Buffalo is given under this section. Ohio River traffic is reported under Section VII—Commercial movements on rivers and canals.

WESTERN LIVE-STOCK MOVEMENT.

This movement includes receipts and shipments for January at important interior markets for three successive years. For receipts of live stock at other markets, whose operations are reported in this issue, reference should be made to the general trade movement of these sections.

GRAIN MOVEMENTS FOR CROP PERIODS.

In the following table an attempt is made to present grain movements at interior primary markets in such a manner as to permit of an intelligent study of the effect of each year's production upon such movements. While it is recognized that it would be impossible to present in a single table accurate crop-year periods for each grain, owing to the appreciable difference in time of the maturing and harvesting of the different cereals, it is nevertheless believed that a given period may be used which, although both over and under lapping in certain instances, is comprehensive enough to answer all practical purposes, especially where figures representing movements for cumulative periods of two or more months are employed. To make possible, therefore, the presentation of such information in a single table, September 1 has been decided upon as the fairest arbitrary date on which such statements should begin.

II.—DOMESTIC COMMERCE ON THE GREAT LAKES.

The traffic taken account of in the following tables, except where otherwise specified, is coastwise traffic only, and is confined strictly to commerce between domestic ports during January. Unless otherwise credited, the statistics of domestic commerce reported herewith are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

During January transactions at 21 ports of receipt and 25 ports of shipment were reported. The number of vessels arriving in January was 856 and the clearances numbered 856 vessels. The net registered tonnage for the month was as follows: Arrivals, 908,873 net tons; clearances, 912,044 net tons. These totals do not include the tonnage of vessels engaged in trade between the United States and Canada.

SUMMARY OF DOMESTIC LAKE TRAFFIC FOR THE MONTH OF JANUARY, 1904-1908.

A summary of the lake traffic for January, compared with the corresponding months in 1904, 1905, 1906, and 1907, is given in the following table. The various quantities and units of freight are reduced to their equivalents in net tons. January receipts in 1908 at all ports reporting were 244,423 net tons, compared with 335,345 net tons in January, 1907; 314,236 net tons in January, 1906; 233,062 net tons in January, 1905, and 228,894 net tons in January, 1904. The figures of shipments of coal include coal loaded for vessels' fuel consumption.

IV.—COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

The scope of commercial movements represented in this section usually includes receipts and shipments of merchandise between New York and New England ports, giving the bulk of the water-borne trade of nine of these ports with New York; coal shipments by water from New York, Philadelphia, Baltimore, Norfolk, and Newport News to seaboard points north and south; coastwise receipts of southern pine and eastern spruce, by cargoes, at New York from sources of origin, and coastwise and foreign shipping movements at Boston, New York, Philadelphia, Mobile, Galveston, Port Arthur, and Sabine Pass. Coastwise coal shipments from New York, Philadelphia, Baltimore, Newport News, and Norfolk are also presented. Coastwise shipments of petroleum from Texas producing territory to Atlantic and Gulf ports are given in Section VIII. Representative freight rates quoted to leading destinations on the eastern and southern coasts are shown in Section IX.

COAL SHIPMENTS BY WATER FROM NEW YORK, PHILADELPHIA, BALTIMORE, NEWPORT NEWS, NORFOLK.

Through the courtesy and cooperation of nearly all of the more prominent shippers of coal by water from the middle Atlantic ports of New York, Philadelphia, Baltimore, Newport News, and Norfolk to Atlantic, Gulf, and Pacific coast ports, the following figures of the coastwise coal movement have been obtained. These statistics cover probably more than 90 per cent of the shipments for the places and periods mentioned, and include both anthracite and bituminous coal. Anthracite coal is shipped principally from New York Harbor wharves. From Philadelphia shipments are primarily bituminous and secondarily anthracite. From Baltimore, Newport News, and Norfolk shipments are almost wholly bituminous. During January vessels were supplied with fuel at these five ports to the amount of 285,924 tons.

During January 72 collectors of customs report 637,363 gross tons of coal loaded on vessels for fueling purposes on the Atlantic, Gulf, and Pacific coasts. Of this total, 117,973 tons were placed on board vessels destined to domestic ports [a] and 519,390 tons on foreign-bound vessels. The total value of this tonnage was reported as being $2,427,907, an average of about $3.81 per ton.

Moreover, 2,103 gross tons of bunker coal were placed on lake vessels in the foreign trade during the month of January, 1908.

V.—COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY.

The territory covered in this section includes that lying south of the Potomac and Ohio rivers and east of the Mississippi River and that portion west of the Mississippi included in the States of Louisiana, Oklahoma, and Texas. The characteristic traffic movements are those of cotton, lumber, naval stores, and general commodities.

Cotton-trade reports include the statement of the quantity of the crop brought into sight and its disposition, during successive crop years, to the end of August. Other articles of traffic reported are the grain and rice movements at New Orleans, shipments of yellow pine from the Southwest and from Virginia and the Carolinas to destinations, and river and rail traffic at Louisville, Ky., and Little Rock, Ark. Southern river trade is given in Section VII, southern coastwise shipments under Section IV.

SOUTHERN COTTON MOVEMENT.

According to the practice of the New Orleans Cotton Exchange, whose official figures are used, except when otherwise specified, the amount of cotton brought into sight from month to month during the season includes (1) receipts from plantations at ports; (2) receipts at the overland points of crossing on the Mississippi, Ohio, and Potomac rivers for shipment direct to northern and eastern mills; and (3) takings by southern mills. To this must be added (4) stocks left over at the end of the year at ports and interior towns. These four items together give the total commercial supply available for distribution.

VII.—COMMERCIAL MOVEMENTS ON RIVERS AND CANALS.

The movements of domestic trade represented under this heading are not confined to any particular geographical division of the country. Operations on some of the leading waterways include those on the Monongahela River between Pittsburg, Pa., and Fairmont, W. Va.; the Ohio River at Davis Island dam, Bellevue, Pa., and at Louisville, Ky.; the vessel movement at Cairo, Ill., on the Ohio and the Mississippi rivers; the traffic movements on the Delaware and Chesapeake Canal, connecting the Chesapeake and Delaware bays, and similar movements on various other navigable streams about whose navigation acceptable information is periodically available.

Unless otherwise specified, the data out of which the following tables are constructed are derived from monthly reports received from the engineers in charge of river and harbor improvements under the auspices of the War Department.

TRAFFIC ON THE MONONGAHELA RIVER.

The iron and steel products passing Lock No. 1 represent practically the entire river traffic of these products. The coal passing downstream through Lock No. 3, plus 121,661 tons mined in the first and second polls during January, makes a total coal traffic of 900,061 tons for the river during January. Of other downstream freight, 13,770 tons of miscellaneous merchandise are to be added, making a total of 913,831 net tons in January. Lock No. 3 represents approximately the general aggregate of down-river tonnage.

Of upstream freight, that passing through Lock No. 1 represents approximately the general movement in this direction. The freight passing this point in January amounted to 78,880 tons.

The total freight moved in both directions, on this basis of calculation, was 992,711 net tons in January, 1908, as against 663,971 net tons in January, 1907, 970,660 net tons in January, 1906, and 690,776 net tons in January, 1905.

VESSEL MOVEMENT ON THE MISSISSIPPI AND OHIO RIVERS VIA CAIRO, ILL.

The following table is compiled from monthly reports received from Cairo, Ill., giving the number and tonnage of vessels passing or having their termini there. The tonnage of boats and barges is estimated tonnage. The tonnage of steamboats is actual.

The total through movement represents vessels passing Cairo to or from points on the Ohio, Mississippi, and other rivers. The local movement at Cairo represents vessels having Cairo as one of their termini. (The monthly reports of arrivals and clearances are made by Mr. George Parsons, trustee of Cairo trust property, who is intimately acquainted with river operations at this point.)

For the month ending January 31, 1908, of the vessels reported, 277 were loaded with coal; 70 carried lumber, logs, piling, and wood 10 carried ties; 43 carried merchandise; 2, rocks; 10, corn; 14, manufactured iron, and 1, molasses.

VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, AND PETROLEUM—PRODUCTION OF PIG IRON.

The series of tables following present some of the leading traffic operations in domestic coal, coke, and petroleum; also figures of pig-iron production by principal districts. They include shipments of anthracite coal from the anthracite regions, anthracite and bituminous coal and coke traffic originating east of Pittsburg and Erie on the Pennsylvania Railroad system, coal and coke shipments over the Baltimore and Ohio Railroad, the Chesapeake and Ohio Railway, the Norfolk and Western Railroad, and other eastern roads, weekly Connellsville coke output and shipments, St. Louis receipts of coal, and receipts and shipments of coal and coke at Chicago. Petroleum statistics are included for the pipe-line territory in the Appalachian, Lima-Indiana, and Midcontinental fields. Statistics of pig-iron production cover the principal producing districts, and are exclusive of small quantities of charcoal iron. For coastwise coal trade generally, see Section IV; for Lake trade, Section II.

STATEMENT OF PIPE LINES IN APPALACHIAN, LIMA-INDIANA, AND MIDCONTINENT FIELDS.

The following table shows the business of the principal petroleum pipe lines in the Appalachian, Lima-Indiana, and Midcontinent fields. The Appalachian field includes Pennsylvania, New York, West Virginia, southeastern Ohio, Kentucky, and Tennessee. The Lima-Indiana field includes northwestern Ohio, Indiana, and the productions in Illinois. The Midcontinent field includes Kansas, Indian Territory, and Oklahoma.

Digitized by Google

The pipe lines which report no runs from wells receive their oil through other pipe lines. The regular deliveries represent deliveries to refineries and for export, and do not include deliveries to other pipe lines. The runs from wells represent Appalachian oil exclusively in all cases except three, namely: The Buckeye, which receives Appalachian crude from southeastern Ohio and Lima-Indiana crude from northwestern Ohio; the Indiana Pipe Line Company, which receives crude from Indiana and Illinois, and the Prairie Oil and Gas Company, which operates in the Midcontinent field.

Prior to August, 1906, the Buckeye pipe line reported separately its Appalachian crude, and its Lima-Indiana crude was reported jointly with that of the Indiana pipe line. Also, prior to this date, the pipe lines distinguished deliveries and net stocks of Appalachian oil from those of Lima-Indiana oil, but at present the deliveries and stocks of several of the companies reported in the following table include both kinds of crude oil.

Net stocks, often called liabilities, represent the amount of oil for which the pipe lines have receipted to producers and which they are liable for. In addition, the pipe lines hold a certain amount of sediment and surplus oil which, combined with net stocks, constitute gross stocks.

X.—CHANGES IN RAILROAD FREIGHT RATES.

Changes in railroad freight rates are obtained through the courtesy of the Interstate Commerce Commission, the auditor of that body transmitting them on the latest date which will permit of their insertion in the Summary. In this manner their publication is assured as soon after their receipt as possible, and as a rule they cover a period nearly a month later than that represented by other statements throughout this report.

The matter of deciding what changes shall be considered of enough importance to be presented is left entirely to the discretion of the Commission, all tables which they submit being published without reservation of any kind. This, however, must not be taken to indicate that all important changes are included, as such a presentation would be a practical impossibility, owing to the great number of tariffs to be examined and the short time in which to procure the rates therefrom.

No changes in railroad freight rates were reported by the Interstate Commerce Commission for the month of January, 1908.

EXPLANATIONS OF REGULAR STATISTICAL TABLES.

General imports.—The regular statement of imports of merchandise, by articles and countries, in this publication is what is termed the statement of *general imports*, embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse, as distinguished from special imports, which embrace imports entered for immediate consumption and withdrawals from warehouse for consumption.

The statement of *general imports* and the statement of *imports entered for consumption* for any period will differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption*. The term "*entry for consumption*" is the technical name of the import entry made at the custom-house, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion.

The values of articles imported since August 1, 1890, are governed by the provisions of section 19 of the act of June 10, 1890, which prescribes that the values of imported merchandise subject to ad valorem rates of duty shall be "the actual market value or wholesale price of such merchandise as bought and sold in usual wholesale quantities at the time of exportation to the United States in the principal markets of the country from whence imported and in the condition in which such merchandise is there bought for exportation to the United States or consigned to the United States for sale, including the value of all cartons, cases, crates, boxes, sacks and coverings of any kind, and all other costs, charges, and expenses incident to placing the merchandise in condition ready for shipment to the United States.

Domestic exports.—The regular statement of domestic exports, by articles and countries, in this publication exhibits the exports of domestic products or manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles, utensils, etc., made from imported materials. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported.

Foreign exports.—The regular statement of foreign exports, by articles, in this publication, sometimes called "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported "from warehouse" is their import value; the value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

Warehoused merchandise.—The regular statement of articles remaining in warehouse in this publication exhibits imported merchandise in bonded warehouses. This merchandise has already appeared in the statement of *general imports*. The official values of the articles therein represented are the same as the *import values*.

Tonnage tables.—In the tables of tonnage movement in American foreign trade the tonnage is stated in net tons of 100 cubic feet carrying space after the prescribed allowances are made for crew space, engine space, etc.

Weights.—In all tables published by the Bureau the ton weight is 2,240 pounds and the hundredweight is 112 pounds, unless indicated otherwise.

Customs districts.—Statements of imports, exports, and tonnage movement are shown by customs districts, which have a certain prescribed limit of territory with a port of entry. The customs districts having the port of entry with name different from that of the customs district are the following:

COMMERCE BETWEEN THE UNITED STATES AND ITS NONCONTIGUOUS TERRITORIES AND BETWEEN SAID TERRITORIES AND FOREIGN COUNTRIES.

The following tables show the commerce of the noncontiguous territories of the United States with the United States and with foreign countries for comparative periods of time. Customs collectors were not required prior to the act of April 29, 1902, to furnish statements of shipments of merchandise between the United States and its noncontiguous possessions.

Hawaii was annexed to the United States by act of Congress of July 7, 1898, and was made a Territory and customs district by act of April 30, 1900, which took effect June 14, 1900.

Porto Rico was taken possession of by the United States October 18, 1898, and was given a civil government and made a customs district by act of April 12, 1900, to take effect May 1, 1900.

The figures of the commerce between the Philippine Islands and the United States, while at present included in the general tables of foreign commerce of the United States, are also presented herewith in conjunction with the other tables of this group.

INTERNAL COMMERCE OF THE UNITED STATES.

MORRIS JACOBSON, *Internal Commerce Expert.*

FEBRUARY SUMMARY OF INTERNAL TRADE MOVEMENTS.

The Summary of Internal Commerce for February, 1908, includes tables exhibiting the comparative progress of trade movements in different parts of the United States for the month and the two months of the current and two or more preceding years. These statistics are gathered partly through the cooperation of commercial organizations and transportation companies, partly by compilation from authoritative trade publications, and to an increasing extent from official reports made by this and other departments of the public service. Statistics of domestic commerce on the Great Lakes, unless otherwise credited, are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

The tables which appear in this issue represent six different geographical sections, as follows: I. Commercial movements at interior centers; II. Coastwise commerce on the Great Lakes; III. Commercial movements at the North Atlantic seaboard; IV. Coastwise commerce at Atlantic and Gulf ports; V. Commercial movements in southern territory; and VI. Commercial movements on the Pacific coast. Other tables representing no particular geographical sections are: VII. Commercial movements on rivers and canals; VIII. Commercial movements of coal, coke, petroleum, and pig-iron production; IX. Ocean freight rates; and X. Changes in rail freight rates.

I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

[For tables pertaining to this section, see page 1554.]

Receipts of live stock at 7 interior primary markets during February, 3,680,734 head, while showing a daily average movement below that obtaining for the preceding month were, however, in excess of the February, 1907 and 1906, figures, 3,312,533 and 3,313,098 head. All the markets in question show larger receipts than a year ago, the increase being especially notable in the cases of Chicago and St. Paul. The increase in total receipts is due exclusively to the larger number of hogs received, 2,311,637 head compared with 1,816,051 head reported for February, 1907. The figures for the other animals, viz., cattle, calves, sheep, and horses and mules, show smaller totals than a year ago. Receipts of all classes of live stock for the first two months of the year totaled 8,210,572 head as against 7,176,978 head reported for the corresponding 1907 period. Of this total 1,379,251 head were cattle, 85,742 head calves, 5,299,897 hogs, 1,368,525 sheep, and 77,157 horses and mules. As in the case of the February receipts, the larger total for the two months is due exclusively to the increased receipts of hogs, the figures for the other animals showing smaller totals than a year ago.

Stocks of meat at five principal interior markets at the close of the month aggregated 342,720,624 pounds, like figures for corresponding periods in 1907 and 1906 being 246,513,416 and 267,795,512 pounds; about two-thirds of the total stocks reported at the end of the month were held at Chicago and Kansas City, Mo.

Shipments of packing house products at Chicago during the month, 221,832,737 pounds, compared favorably with like shipments for February, 1907 and 1906, of 208,604,396 and 214,274,342 pounds, the principal increases over last year's figures appearing under the head of canned meats, cured meats, hides and lard. Shipments for the first two months of the year, 435,131,160 pounds, were slightly below the corresponding 1907 figures, owing to smaller shipments of fresh and pickled beef. Shipments of canned meats for the two months of the year, 14,528,525 pounds, compare favorably with like shipments during the corresponding 1907 period, 12,271,200 pounds, though being 50 per cent below the canned meat shipments of 1906.

Eastbound trunk-line movements of provisions from Chicago and Chicago junction points during the four weeks in February, 99,842 tons, compare favorably with the corresponding 1907 figures of 98,733 tons, being, however, below both the 1905 and 1906 February movements. Figures for the first nine weeks of the year, 212,228 tons, were lower than the corresponding figures for each of the preceding three years. The grain movement in February, 11,633,000 bushels, was but slightly below the February, 1907, figures of 11,795,000 bushels, the figures for the nine weeks of the year, 27,953,000 bushels, being about 2½ million bushels larger than like figures for February, 1907. The lighter movement of grain is more than compensated by the heavier flour movement during the month, 613,417 barrels compared with 557,218 barrels in February, 1907. The flour movement for the first nine weeks of the year, 1,346,535 barrels, likewise compares favorably with the corresponding 1907 figures of 1,340,863 barrels.

Grain receipts during February at 15 primary markets, 48,228,751 bushels, show a heavy decline, both as compared with the figures of the preceding month as well as the corresponding 1907 and 1906 figures of 61,547,417 bushels and 58,402,238 bushels, the decrease in the total being due mainly to smaller receipts at Chicago, Kansas City, Milwaukee, Minneapolis, and St. Louis. The total grain receipts were made up of 12,469,581 bushels of wheat, 17,155,783 bushels of corn, 14,086,119 bushels of oats, 3,860,900 bushels of barley, and 656,368 bushels of rye. Extremely light receipts of corn, 17,155,783 bushels compared with 28,025,136 bushels reported for February, 1907, and lower receipts of wheat, 12,469,581 bushels compared with 15,112,361 bushels for February, 1907, account for the smaller total. Grain receipts at the same markets for the six months of the present crop season beginning September 1,442,348,675 bushels, were over 13 million bushels less than for the six months of the preceding season, and 13 per cent below the 1905-6 season receipts; the decrease is due mainly to smaller corn receipts, though the receipts of wheat and rye also show slightly lower totals than a year ago. Of the larger markets Chicago, Duluth, and Minneapolis show larger season receipts, while Kansas City, Milwaukee, and St. Louis show smaller receipts than for the six months in 1906 and 1907.

II.—DOMESTIC COMMERCE ON THE GREAT LAKES.

[For tables pertaining to this section see page 1562.]

Domestic shipments from principal ports on the Great Lakes during February aggregated 199,524 net tons compared with 320,121 and 348,048 net tons reported for the corresponding 1907 and 1906 periods. The freight movement during the month, almost exclusively of local character between Lake Michigan ports, consisted mainly of soft coal, 37,623 net tons, compared with 118,116 net tons shipped during February, 1907; grain, 820,571 bushels, compared with 1,548,394 bushels; flour, 21,087 net tons, as against 13,553 net tons, lumber, 10,679,000 feet, compared with 17,254,000 feet shipped during February, 1907, and miscellaneous merchandise, 91,397 net tons compared with 101,974 net tons shipped during February, 1907. The vessel clearances at all ports on the Great Lakes during February included 716 vessels of 781,484 net tons register, compared with 873 vessels of 969,035 net tons cleared during February, 1907. Milwaukee shows the largest number or clearances, 167 vessels of 194,286 net tons register; Ludington with 119 vessels cleared of 170,519 net tons register; Manitowoc with 76 vessels of 97,541 net tons register; Racine with 70 vessels of 53,498 net tons register; and Grand Haven with 51 vessels of 71,568 net tons, were the only other larger ports showing an apparently regular navigation movement during the month.

III.—COMMERCIAL MOVEMENTS AT THE NORTH ATLANTIC SEABOARD.

[For tables pertaining to this section see page 1566.]

Live-stock receipts at four principal Atlantic seacoast cities—Boston, New York, Philadelphia, and Baltimore—during the month or four weeks in February, aggregated 801,562 head, compared with 538,210 head received during the same period in 1907. Of the total receipts during the month, at the 4 cities named, 90,700 head were cattle, 25,219 calves, 462,259 hogs, and 223,384 sheep, the increases being most notable in the cases of hogs and sheep. Receipts for the first two months of the year, 1,773,748 head, were over half a million in excess of like receipts in 1907, New York and Boston showing the largest increases over the 1907 figures.

Grain and flour receipts at the four mentioned cities for the month aggregated 18,384,558 bushels, compared with 18,602,016 and 23,022,410 bushels received during 1907 and 1906. Of the total given, Boston is credited with 1,723,240 bushels, New York with 7,212,039 bushels, Philadelphia with 3,209,082 bushels, and Baltimore with 6,240,197 bushels. New York and Baltimore reported larger receipts than a year ago, while receipts at Philadelphia fell off almost 20 per cent, as compared with the 1907 figures. The wheat receipts at these 4 cities were 2,256,867 bushels, as against 2,956,297 bushels recorded for February, 1907. Corn receipts aggregated 8,629,327 bushels, compared with 8,599,674 bushels, while the flour receipts, 1,100,652 barrels, compared with 1,032,622 barrels received during February, 1907. Smaller wheat receipts are recorded for New York, Philadelphia, and Baltimore, the corn receipts show smaller totals in the cases of Boston and Philadelphia, while smaller flour receipts are reported for Boston and Baltimore. The aggregate grain and flour receipts at these 4 cities during the first two months of the year, 36,593,650 bushels, were below the corresponding 1907 and 1906 figures of 40,444,007 and 55,852,904 bushels, the largest losses being shown by Boston and Philadelphia. Of the total grain and flour receipts, at the 4 cities for the two months 5,690,615 bushels were wheat, 13,904,906 bushels were corn, and 2,376,638 barrels flour, all these items, especially wheat and corn, being below the corresponding 1907 figures. The aggregate wheat exports from these points for the first two months, 8,171,171 bushels, exceed by far the receipts for the same period, being 47 per cent in excess of like figures for the first two months of 1907. Corn exports from these 4 cities during the same period aggregated 9,003,630 bushels, while the exports of flour during the same period were 1,489,622 barrels, marking an increase over the 1907 figures of almost 30 per cent.

IV.—COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

[For tables pertaining to this section see page 1569.]

Coastwise receipts of southern pine at New York during the month ending February 25, 17,809,741 feet, were less than half the total reported for the corresponding 1907 period, the principal losses occurring in the receipts from Jacksonville, Fla., Savannah, Ga., and Brunswick, Ga. Figures for the first two months, 40,726,531 feet, show a decrease of about 40 per cent as compared with the corresponding 1907 total.

Coastwise shipping arrivals at Boston during the month comprised 517 vessels, of 612,336 gross tons, compared with 506 vessels of 578,987 gross tons reported for February, 1907. Arrivals in the coastwise trade at Philadelphia for the month numbered 179 vessels, compared with 241 vessels reported during February, 1907, while figures for the two months of the year, 489 vessels, also show a heavy decrease as compared with the 581 vessels reported for the first two months in 1907.

V.—COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY.

[For tables pertaining to this section see page 1572.]

Sight receipts of cotton for the six months of the season beginning with September 1, 9,214,849 bales, were about 17 per cent below the corresponding figures of the preceding season, 11,053,332 bales, though about half a million bales in excess of the 1905-6 figures. The United States Census Office reports 11,261,163 bales of cotton ginned for the present season, compared with 13,305,265 and 10,725,602 bales for the 1906-7 and 1905-6 seasons, indicating a decrease of over 16 per cent and an increase of 5 per cent as compared with the total quantities ginned during the two preceding seasons. The ratio between sight receipts and the quantities ginned was 81.8 per cent for the current season, as against 83.1 per cent for the 1906-7 season and 81.8 per cent for the 1905-6 season. Port receipts during the first six months of the season aggregated 6,949,805 bales, compared with 8,244,434 and 6,224,496 bales for the corresponding periods in 1907 and 1906. pared with 3,401,982 and 3,130,532 bales for the corresponding months of the 1907 and 1906 seasons. Of the total takings, over 55 per cent are credited to southern mills. Total American stocks held at the end of the month were 1,122,701 bales, compared with 1,654,735 bales and 1,440,363 bales held on corresponding dates in 1907 and 1906.

Receipts of rough rice at New Orleans during February aggregated 129,579 sacks. Receipts for the seven months of the season totaled 1,138,495 sacks, compared with 1,041,297 and 817,280 sacks for the 1906–7 and 1905–6 seasons. Shipments of clean rice for the month were 199,880 pockets, while shipments for the seven months of the current season were 1,178,600 pockets, compared with 1,245,233 and 1,373,946 pockets reported for the corresponding periods in 1906–7 and 1905–6.

Receipts of spirits of turpentine at Savannah, Ga., since April 1, 1907, are given as 199,301 barrels, compared with 189,408 barrels and 202,671 barrels reported for the 1906–7 and 1905–6 seasons. Receipts of rosin for the same periods are stated as 687,774 barrels, as against 640,238 and 667,682 barrels, respectively. The total shipments of spirits of turpentine for the eleven months of the season were 179,680 barrels, compared with 185,222 and 201,777 barrels during the 1906–7 and 1905–6 seasons; season shipments of rosin, 653,864 barrels, were somewhat larger than like shipments during the two preceding seasons of 622,661 and 643,025 barrels. Stocks on hand at the end of the month show the unusually high figures of 26,080 barrels of spirits of turpentine and 76,326 barrels of rosin.

VI.—COMMERCIAL MOVEMENTS ON THE PACIFIC COAST.

[For tables pertaining to this section see page 1577.]

Shipments of redwood lumber from upper California during the month aggregated 23,430,690 feet, compared with 39,405,940 feet and 26,120,448 feet shipped during February, 1907 and 1906. Of the total shipments, 12,596,391 feet were directed to San Francisco Bay, 3,109,488 feet to southern California points, and 7,724,811 feet to other, including foreign, destinations. Shipments for the first two months of the year totaled 40,359,325 feet, compared with 72,817,516 and 48,785,275 feet reported for the first two months in 1907 and 1906.

Arrivals of pine and fir at California points likewise show a heavy decrease, from 118,585,086 feet for February, 1907, to 66,828,601 feet for February, 1908. Figures for the first two months of the year, 151,536,708 feet, are about 100 million below the corresponding 1907 total. Receipts of pine and fir at San Francisco Bay for the first two months of the year were 88,700,506 feet, compared with 152,354,756 feet reported for the corresponding 1907 period.

Receipts of flour and grain at San Francisco during the month, 1,058,669 bushels, were below the corresponding 1907 figures of 1,232,671 bushels, the main decrease occurring under the head of barley. Receipts for the first two months of the year, 2,422,584 bushels, show a considerable decline compared with 1907 figures, owing to smaller receipts of barley, though the wheat receipts were more than double those reported for the first two months in 1907.

Lumber shipments from Portland during the month totaled 11,809,856 feet, compared with 17,396,092 feet reported for February, 1907. Of the total, 4,159,000 feet were domestic shipments, as against 13,483,000 feet during February, 1907, while the foreign shipments for the month, 7,650,856 feet, were largely in excess of those reported a year ago. Total shipments for the first two months of the year, 29,511,948 feet, owing to heavier exports, show but a slight decrease as compared with corresponding 1907 figures.

Citrus fruit shipments from southern California for the month were 4,336 cars, of which 3,902 cars were oranges and 434 cars lemons; shipments for the four months of the crop season ending February included 9,948 cars, of which 8,486 cars were oranges and 1,462 cars lemons; corresponding totals for the 1906–7 and 1905–6 seasons were 7,913 and 9,494 cars.

VII.—COMMERCIAL MOVEMENTS ON RIVERS AND CANALS.

[For tables pertaining to this section, see page 1581.]

Upstream traffic during February on the Monongahela River at Lock No. 1, representing the maximum upstream movement on that river comprised 56,215 tons, of which 32,828 tons were gravel, 16,966 tons sand, and 4,347 tons iron and steel products. Downstream traffic during the month at Lock No. 3, representing the maximum downstream movement on the river, 651,558 tons, was composed of 643,040 tons of bituminous coal, 2,051 tons of iron and steel products, and relatively small quantities of sand, building stone, and general merchandise. Figures for the two months of the year show an upstream movement at Lock No. 1 of 135,095 tons, compared with 146,498 tons for the first two months in 1907; and a downstream movement at Lock No. 3 of 1,443,728 tons, compared with 1,405,880 tons for the corresponding 1907 period.

Arrivals by river at Cairo during the month aggregated 538 vessels of 338,362 tons, compared with 460 vessels of 345,976 tons reported for February, 1907. Of the total stated, 408 vessels of 269,900 tons represented a through movement, and 130 vessels of 68,462 tons a local movement. Figures for the first two months of the year include 1,394 vessels of 853,168 tons, compared with 922 vessels of 646,669 tons reported for the first two months of 1907.

VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, AND PETROLEUM—PIG-IRON PRODUCTION.

[For tables pertaining to this section, see page 1583.]

Anthracite coal shipments from eastern producing territory for the month totaled 4,503,756 gross tons, compared with 4,563,720 gross tons shipped during February, 1907. Shipments during the first two months of the year, 10,122,095 gross tons, are over 300,000 tons in excess of the corresponding 1907 figures.

Coal and coke traffic originating on the Pennsylvania Railroad Company's lines east of Pittsburg and Erie during the month, 3,420,979 net tons, while considerably below the corresponding 1907 figures of 4,195,526 net tons, show, however, a slight improvement as compared with the movement during the first five weeks of the year as indicated by the respective weekly averages of all classes of coal carried. Figures of coal and coke traffic over other eastern lines for the month are all less than for February, 1907, the largest decrease of traffic occurring on the Pittsburg and Lake Erie Railroad and short lines, the shrinkage amounting to about 33 per cent, from 1,201,948 tons during February, 1907, to 802,705 tons during February, 1908.

The estimated coke production at Connellsville, including the lower district during the four weeks ending February 29, 713,323 net tons, while 57 per cent below the corresponding 1907 figures, shows, however, a slightly larger weekly average than the production for the first five weeks of the year. The weekly average of idle ovens for the first nine weeks of the year, 19,983, is still larger than the number of active ovens, 16,278. The number of cars used in shipping the product since the beginning of the year is stated as 55,657, compared with 132,933 cars used during the same period in 1907.

Production of anthracite and coke pig iron during the month, 1,079,721 gross tons, though almost a million tons below the February, 1907, output, was, however, in excess of the January total, the daily rate during February being 37,232 tons, as compared with 33,718 tons in January. Increases as compared with January totals are reported, among others, for Pittsburg, the Mahoning Valley, the central and northern Ohio districts, and the works located in the Southern States.

Runs of petroleum from wells tributary to the principal pipe lines in the Appalachian, Lima-Indiana, and mid-continent fields, during February aggregated 7,573,925 barrels; gross stocks of reporting lines at the end of the month, 61,346,409 barrels, were larger than at the end of January, while regular deliveries to consumers are stated as 7,221,259 barrels.

IX.—CHANGES IN OCEAN FREIGHT RATES.

[For tables pertaining to this section, see page 1588.]

Published ocean freight rates on grain shipments from New York and Boston to Liverpool and London show a decided decline from the higher figures of the preceding months. The grain rates from Atlantic ports to Hamburg, on the other hand, show a return to the higher rates prevailing during December of the past year. New Orleans grain rates to both British and continental ports, on the whole, tended downward, both as compared with January as well as last year's quotations. Flour rates, while in most cases higher than a year ago, likewise show a lower level for the month than for the immediately preceding period. The cotton rates from New Orleans, both on British and continental consignments, show but slight changes as compared with earlier quotations. Cotton rates from Atlantic ports in many cases were considerably below those quoted during the last two months.

X.—CHANGES IN RAILROAD FREIGHT RATES.

[For tables pertaining to this section, see page 1589.]

No changes in railroad rates were reported to the office by the Interstate Commerce Commission for the month of February, 1908.

COMPARISON OF CAR-SERVICE OPERATIONS.

A convenient index to the traffic activities of the country is found in the comparative figures of cars handled by the various car-service associations. Thirty-seven different associations report monthly the number of cars handled in their respective territories. Only in a very rough way, however, do these figures indicate the changes in volume of traffic, inasmuch as they do not, in some cases, include more than one-third of the cars actually handled at a given traffic center, and the territory under control of an association may be extended or contracted from time to time. The figures are given, nevertheless, as a convenient general gauge of increase or decrease of traffic by rail, assuming that they are made up on substantially the same basis from year to year.

Reports from 37 car-service associations show a total number of cars handled during the twenty-nine days in February, of 2,075,463 as compared with 2,530,750 cars and 2,485,222 cars handled during February, 1907 and 1906. While the February figures are below like January figures of 2,418,909 cars, the average daily number of cars handled during the shorter month, 71,568, compared with the corresponding average for January, 71,255 cars, indicates a slight improvement in traffic operations for the country as a whole.

The American Railway Association, from reports of 162 roads, is also able to note a slight improvement in the traffic situation, the number of idle cars showing small though continuous decreases from 343,928 under date of February 5, to 322,513 on February 19, and to 314,992 on March 4. The improvement does not seem to have affected equally the various classes of traffic, as can be seen from the changes in the number of idle coal, gondola, and hopper cars used in the transportation of mine products mainly. This number reached its maximum, 156,634 cars, under date of February 5, decreased to 134,217 on February 19, but increased again to 139,223 cars under date of March 4. While the figures show a slight improvement for the country as a whole (including Canada), the Southern and Western sections of the country, also the States in the Mississippi Valley, show a larger car surplus for the first week in March than for the last week in January. The better showing for the country as a whole is due to the smaller number of idle cars reported from the Eastern States and the Middle and Northwestern sections.

I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

The territory embraced in this section extends from Minneapolis, in the Northwest, to Little Rock, in the Southwest, east as far as Buffalo, and south as far as the Ohio River. Interior traffic movements for February and two months of succeeding years are shown by tables of live-stock receipts and shipments and comparative stocks of provisions at the most important packing-house centers; by tables of receipts and shipments of flour, grain, produce, and merchandise; and by trunk-line shipments of flour, grain, and provisions from Chicago. During the season of canal navigation, canal and rail traffic in grain, flour, and general merchandise at Buffalo is given under this section. Ohio River traffic is reported under Section VII—Commercial movements on rivers and canals.

WESTERN LIVE-STOCK MOVEMENT.

This movement includes receipts and shipments for February and two months at important interior markets for three successive years. For receipts of live stock at other markets, whose operations are reported in this issue, reference should be made to the general trade movement of these sections.

GRAIN MOVEMENTS FOR CROP PERIODS.

In the following table an attempt is made to present grain movements at interior primary markets in such a manner as to permit of an intelligent study of the effect of each year's production upon such movements. While it is recognized that it would be impossible to present in a single table accurate crop-year periods for each grain, owing to the appreciable difference in time of the maturing and harvesting of the different cereals, it is nevertheless believed that a given period may be used which, although both over and under lapping in certain instances, is comprehensive enough to answer all practical purposes, especially where figures representing movements for cumulative periods of two or more months are employed. To make possible, therefore, the presentation of such information in a single table, September 1 has been decided upon as the fairest arbitrary date on which such statements should begin.

IV.—COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

The scope of commercial movements represented in this section usually includes receipts and shipments of merchandise between New York and New England ports, giving the bulk of the water-borne trade of nine of these ports with New York; coal shipments by water from New York, Philadelphia, Baltimore, Norfolk, and Newport News to seaboard points north and south; coastwise receipts of southern pine and eastern spruce, by cargoes, at New York from sources of origin, and coastwise and foreign shipping movements at Boston, New York, Philadelphia, Mobile, Galveston, Port Arthur, and Sabine Pass. Coastwise coal shipments from New York, Philadelphia, Baltimore, Newport News, and Norfolk are also presented. Coastwise shipments of petroleum from Texas producing territory to Atlantic and Gulf ports are given in Section VIII. Representative freight rates quoted to leading destinations on the eastern and southern coasts are shown in Section IX.

COAL SHIPMENTS BY WATER FROM NEW YORK, PHILADELPHIA, BALTIMORE, NEWPORT NEWS, NORFOLK.

Through the courtesy and cooperation of nearly all of the more prominent shippers of coal by water from the middle Atlantic ports of New York, Philadelphia, Baltimore, Newport News, and Norfolk to Atlantic, Gulf, and Pacific coast ports, the following figures of the coastwise coal movement have been obtained. These statistics cover probably more than 90 per cent of the shipments for the places and periods mentioned, and include both anthracite and bituminous coal. Anthracite coal is shipped principally from New York Harbor wharves. From Philadelphia shipments are primarily bituminous and secondarily anthracite. From Baltimore, Newport News, and Norfolk shipments are almost wholly bituminous. During February vessels were supplied with fuel at these five ports to the amount of 271,807 tons.

During February 70 collectors of customs report 554,822 gross tons of coal loaded on vessels for fueling purposes on the Atlantic, Gulf, and Pacific coasts. Of this total, 101,465 tons were placed on board vessels destined to domestic ports and 453,357 tons on foreign-bound vessels. No figures of bunker coal supplied to vessels in the coastwise trade were received for New York customs district for the month. The total value of this tonnage was reported as being $1,945,682, an average of about $3.51 per ton.

Moreover, 662 gross tons of bunker coal were placed on lake vessels in the foreign trade during the month of February, 1908.

V.—COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY.

The territory covered in this section includes that lying south of the Potomac and Ohio rivers and east of the Mississippi River and that portion west of the Mississippi included in the States of Louisiana, Oklahoma, and Texas. The characteristic traffic movements are those of cotton, lumber, naval stores, and general commodities.

Cotton-trade reports include the statement of the quantity of the crop brought into sight and its disposition, during successive crop years, to the end of August. Other articles of traffic reported are the grain and rice movements at New Orleans, shipments of yellow pine from the Southwest and from Virginia and the Carolinas to destinations, and river and rail traffic at Louisville, Ky., and Little Rock, Ark. Southern river trade is given in Section VII, southern coastwise shipments under Section IV.

SOUTHERN COTTON MOVEMENT.

According to the practice of the New Orleans Cotton Exchange, whose official figures are used, except when otherwise specified, the amount of cotton brought into sight from month to month during the season includes (1) receipts from plantations at ports; (2) receipts at the overland points of crossing on the Mississippi, Ohio, and Potomac rivers for shipment direct to northern and eastern mills; and (3) takings by southern mills. To this must be added (4) stocks left over at the end of the year at ports and interior towns. These four items together give the total commercial supply available for distribution.

The Director of the Census reports the following quantities of cotton ginned up to March 1 of the current year compared with like quantities for corresponding periods in 1906 and 1905:

[a] Counting round as half bales and including linters.
[b] Includes linters of establishments in Illinois and in Virginia.

The statistics of this report for 1907 are subject to slight corrections which may result from the canvass by mail of the individual ginneries, to be made about April 1, for the purpose of verifying the accuracy of the season's returns. Included in the statistics for 1907 are 127,646 bales, counting round as half bales and including linters, returned as remaining to be ginned after the time of the March canvass.

Average gross weight of the bale for 1907, including linters subject to correction, is 501.8 pounds, compared with 510.9 for 1906; that of the round bale is 246.1 for 1907, compared with 245.1 for 1906; and the sea island 391.6 for 1907, compared with 387.2 for 1906.

Round bales included in above statistics are 198,549 for 1907; 268,219 for 1906, and 279,836 for 1905. Sea-island bales included are 86,793 for 1907, 57,550 for 1906; and 112,539 for 1905.

VII.—COMMERCIAL MOVEMENTS ON RIVERS AND CANALS.

The movements of domestic trade represented under this heading are not confined to any particular geographical division of the country. Operations on some of the leading waterways include those on the Monongahela River between Pittsburg, Pa., and Fairmont, W. Va.; the Ohio River at Davis Island dam, Bellevue, Pa., and at Louisville, Ky.; the vessel movement at Cairo, Ill., on the Ohio and the Mississippi rivers; the traffic movements on the Delaware and Chesapeake Canal, connecting the Chesapeake and Delaware bays, and similar movements on various other navigable streams about whose navigation acceptable information is periodically available.

Unless otherwise specified, the data out of which the following tables are constructed are derived from monthly reports received from the engineers in charge of river and harbor improvements under the auspices of the War Department.

VESSEL MOVEMENT ON THE MISSISSIPPI AND OHIO RIVERS VIA CAIRO, ILL.

The following table is compiled from monthly reports received from Cairo, Ill., giving the number and tonnage of vessels passing or having their termini there. The tonnage of boats and barges is estimated tonnage. The tonnage of steamboats is actual.

The total through movement represents vessels passing Cairo to or from points on the Ohio, Mississippi, and other rivers. The local movement at Cairo represents vessels having Cairo as one of their termini. (The monthly reports of arrivals and clearances are made by Mr. George Parsons, trustee of Cairo trust property, who is intimately acquainted with river operations at this point.)

For the two months ending February 29, 1908, of the vessels reported, 371 were loaded with coal; 119 carried lumber, logs, piling, and wood; 14 carried ties; 79 carried merchandise; 5, rocks; 14, corn; 16, manufactured iron, and 5, molasses.

TRAFFIC ON THE MONONGAHELA RIVER.

The iron and steel products passing Lock No. 1 represent practically the entire river traffic of these products. The coal passing down stream through Lock No. 3, plus 44,363 tons mined in the first and second pools during February, makes a total coal traffic of 687,403 tons for the river during February. Of other downstream freight, 8,518 tons of miscellaneous merchandise are to be added, making a total of 695,921 tons in February. Lock No. 3 represents approximately the general aggregate of down-river tonnage.

For two months ending with February the total movement was 1,744,847 tons in 1908, 1,660,040 tons in 1907, and 1,750,399 tons in 1906. Of upstream freight, that passing through Lock No. 1 represents approximately the general movement in this direction. The freight passing this point in February amounted to 56,215 tons.

The total freight moved in both directions, on this basis of calculation, was 752,136 tons in February, 1908, as against 996,069 tons in February, 1907, and 779,739 tons in February, 1906.

VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, AND PETROLEUM—PRODUCTION OF PIG IRON.

The series of tables following present some of the leading traffic operations in domestic coal, coke, and petroleum; also figures of pig-iron production by principal districts. They include shipments of anthracite coal from the anthracite regions, anthracite and bituminous coal and coke traffic originating east of Pittsburg and Erie on the Pennsylvania Railroad system; coal and coke shipments over the Baltimore and Ohio Railroad, the Chesapeake and Ohio Railway, the Norfolk and Western Railroad, and other eastern roads, weekly Connellsville coke output and shipments; St. Louis receipts of coal, and receipts and shipments of coal and coke at Chicago.

Petroleum statistics are included for the pipe-line territory in the Appalachian, Lima-Indiana, and Midcontinental fields. Statistics of pig-iron production cover the principal producing districts, and are exclusive of small quantities of charcoal iron. For coastwise and coal trade generally, see Section IV; for Lake trade, Section II.

STATEMENT OF PIPE LINES IN APPALACHIAN, LIMA-INDIANA, AND MIDCONTINENT FIELDS.

The following table shows the business of the principal petroleum pipe lines in the Appalachian, Lima-Indiana, and Midcontinent fields. The Appalachian field includes Pennsylvania, New York, West Virginia, southeastern Ohio, Kentucky, and Tennessee. The Lima-Indiana field includes northwestern Ohio, Indiana, and the productions in Illinois. The Midcontinent field includes Kansas, and Oklahoma.

The pipe lines which report no runs from wells receive their oil through other pipe lines. The regular deliveries represent deliveries to refineries and for export, and do not include deliveries to other pipe lines. The runs from wells represent Appalachian oil exclusively in all cases except three, namely: The Buckeye, which receives Appalachian crude from southeastern Ohio and Lima-Indiana crude from northwestern Ohio; the Indiana Pipe Line Company, which receives crude from Indiana and Illinois, and the Prairie Oil and Gas Company, which operates in the Midcontinent field.

Prior to August, 1906, the Buckeye pipe line reported separately its Appalachian crude, and its Lima-Indiana crude was reported jointly with that of the Indiana pipe line. Also, prior to this date, the pipe lines distinguished deliveries and net stocks of Appalachian oil from those of Lima-Indiana oil, but at present the deliveries and stocks of several of the companies reported in the following table include both kinds of crude oil.

Net stocks, often called liabilities, represent the amount of oil for which the pipe lines have receipted to producers and which they are liable for. In addition, the pipe lines hold a certain amount of sediment and surplus oil which, combined with net stocks, constitute gross stocks.

STATEMENT OF VARIOUS PETROLEUM PIPE LINES FOR THE MONTH OF FEBRUARY, 1908.

X.—CHANGES IN RAILROAD FREIGHT RATES.

Changes in railroad freight rates are obtained through the courtesy of the Interstate Commerce Commission, the auditor of that body transmitting them on the latest date which will permit of their insertion in the Summary. In this manner their publication is assured as soon after their receipt as possible, and as a rule they cover a period nearly a month later than that represented by other statements throughout this report.

The matter of deciding what changes shall be considered of enough importance to be presented is left entirely to the discretion of the Commission, all tables which they submit being published without reservation of any kind. This, however, must not be taken to indicate that all important changes are included, as such a presentation would be a practical impossibility, owing to the great number of tariffs to be examined and the short time in which to procure the rates therefrom.

No changes in railroad freight rates were reported by the Interstate Commerce Commission for the month of February, 1908.

COMMERCE OF ALASKA, CALENDAR YEAR 1907.

The following statement of the business of the customs district of Alaska was furnished by Clarence L. Hobart, collector of customs of that district:

All vessels plying between Alaska and the United States or a foreign country are compelled by law to enter and clear, and file with the collector of customs a manifest of all cargo on board showing its destination and value, which must be verified by oath. All such manifests are sent from the different subports of Alaska to this office, and from the segregation and footing of these manifests the figures in this report are compiled, covering the calendar year 1907.

Compared with last year's report the general business of Alaska shows a falling off, the total business for the past three years being as follows:

1905.... $39,159,772. 1906.... $52,180,537. 1907.... $48,425,330.

These figures include merchandise received from the United States and afterwards exported to Canada, which in 1907 amounted to a little over a million dollars, but which enters into the legitimate business of the country. The decrease for 1907 is accounted for mainly by reason of the merchants overstocking in 1906 and by a decreased gold production in 1907, caused by labor troubles in the mines.

FOREIGN AND DOMESTIC MERCHANDISE IMPORTED AND EXPORTED IN THE TRADE OF ALASKA WITH THE UNITED STATES AND FOREIGN COUNTRIES DURING THE CALENDAR YEARS 1905 TO 1907.

EXPLANATIONS OF REGULAR STATISTICAL TABLES.

General imports.—The regular statement of imports of merchandise, by articles and countries, in this publication is what is termed the statement of *general imports*, embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse, as distinguished from special imports, which embrace imports entered for immediate consumption and withdrawals from warehouse for consumption.

The statement of *general imports* and the statement of *imports entered for consumption* for any period will differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption*. The term "*entry for consumption*" is the technical name of the import entry made at the custom-house, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion.

The values of articles imported since August 1, 1890, are governed by the provisions of section 19 of the act of June 10, 1890, which prescribes that the values of imported merchandise subject to ad valorem rates of duty shall be "the actual market value or wholesale price of such merchandise as bought and sold in usual wholesale quantities at the time of exportation to the United States in the principal markets of the country from whence imported and in the condition in which such merchandise is there bought for exportation to the United States or consigned to the United States for sale, including the value of all cartons, cases, crates, boxes, sacks and coverings of any kind, and all other costs, charges, and expenses incident to placing the merchandise in condition ready for shipment to the United States.

Domestic exports.—The regular statement of domestic exports, by articles and countries, in this publication exhibits the exports of domestic products or manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles, utensils, etc., made from imported materials. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported.

Foreign exports.—The regular statement of foreign exports, by articles, in this publication, sometimes called "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported "from warehouse" is their import value; the value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

Warehoused merchandise.—The regular statement of articles remaining in warehouse in this publication exhibits imported merchandise in bonded warehouses. This merchandise has already appeared in the statement of *general imports*. The official values of the articles therein represented are the same as the *import values*.

Tonnage tables.—In the tables of tonnage movement in American foreign trade the tonnage is stated in net tons of 100 cubic feet carrying space after the prescribed allowances are made for crew space, engine space, etc.

Weights.—In all tables published by the Bureau the ton weight is 2,240 pounds and the hundredweight is 112 pounds, unless indicated otherwise.

Customs districts.—Statements of imports, exports, and tonnage movement are shown by customs districts, which have a certain prescribed limit of territory with a port of entry. The customs districts having the port of entry with name different from that of the customs district are the following:

COMMERCE BETWEEN THE UNITED STATES AND ITS NONCONTIGUOUS TERRITORIES AND BETWEEN SAID TERRITORIES AND FOREIGN COUNTRIES.

The following tables show the commerce of the noncontiguous territories of the United States with the United States and with foreign countries for comparative periods of time. Customs collectors were not required prior to the act of April 29, 1902, to furnish statements of shipments of merchandise between the United States and its noncontiguous possessions.

Hawaii was annexed to the United States by act of Congress of July 7, 1898, and was made a Territory and customs district by act of April 30, 1900, which took effect June 14, 1900.

Porto Rico was taken possession of by the United States October 18, 1898, and was given a civil government and made a customs district by act of April 12, 1900, to take effect May 1, 1900.

The figures of the commerce between the Philippine Islands and the United States, while at present included in the general tables of foreign commerce of the United States, are also presented herewith in conjunction with the other tables of this group.

INTERNAL COMMERCE OF THE UNITED STATES.

MORRIS JACOBSON, *Internal Commerce Expert.*

MARCH SUMMARY OF INTERNAL TRADE MOVEMENTS.

The Summary of Internal Commerce for March, 1908, includes tables exhibiting the comparative progress of trade movements in different parts of the United States for the month and three months of the current and two or more preceding years. These statistics are gathered partly through the cooperation of commercial organizations and transportation companies, partly by compilation from authoritative trade publications, and to an increasing extent from official reports made by this and other departments of the public service. Statistics of domestic commerce on the Great Lakes, unless otherwise credited, are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

The tables which appear in this issue represent six different geographical sections, as follows: I. Commercial movements at interior centers; II. Coastwise commerce on the Great Lakes; III. Commercial movements at the North Atlantic seaboard; IV. Coastwise commerce at Atlantic and Gulf ports; V. Commercial movements in southern territory; and VI. Commercial movements on the Pacific coast. Other tables representing no particular geographical sections are: VII. Commercial movements on rivers and canals; VIII. Commercial movements of coal, coke, petroleum, and pig-iron production; IX. Ocean freight rates; and X. Changes in rail freight rates.

I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

[For tables pertaining to this section, see page 1744.]

Receipts of live stock at seven interior primary markets during March, 3,379,678 head, while below the January and February aggregates, compared favorably with March receipts in 1907 and 1906, 3,088,978 and 3,286,693 head. All markets in question showed larger receipts than a year ago except Omaha, which market reports, however, an increase over the February receipts. Of the total number of animals received, 657,469 head were cattle, 61,953 head calves, 1,976,490 head hogs, 638,358 head sheep, and 45,408 head horses and mules. The increase as compared with March, 1907 figures is due chiefly to larger arrivals of hogs. The figures for the other animals show slight increases only, or, as in the case of sheep, positive decreases. Receipts of all classes of live stock for the first three months of the year were 11,590,250 head, compared with 10,265,956 and 10,486,149 head reported for the first three months in 1907 and 1906. Increased receipts for the first quarter of the year are shown principally in the case of hogs, while the receipts of cattle and sheep were lighter than during the first quarter in 1907.

Stocks of meat at five principal interior markets at the close of the month, 361,068,018 pounds, were considerably higher than on same dates in 1907 and 1906, 267,423,422 pounds and 264,792,549 pounds. Over 68 per cent of the total stocks held are credited to Chicago and Kansas City, the figures for all the cities, with the exception of Milwaukee, showing increases as compared with like figures at the end of February.

Shipments of packing-house products from Chicago during the month, 200,450,012 pounds, show a 10 per cent decline from the February total, and hardly any increase over the March, 1907, figures of 199,525,571 pounds. As against increased shipments of fresh beef and canned meats, smaller shipments are reported under the head of lard, pickled beef, pork, and tallow. The canned-meat shipments for the month were 7,031,775 pounds, compared with 5,663,775 pounds and 10,883,775 pounds for March, 1907 and 1906, respectively. Shipments for the first quarter of the year, 635,581,172 pounds, were below like figures for the first quarter for 1907 and 1906, 637,304,757 and 700,652,474 pounds. The shipments of canned meats for the first quarter of the year, while about 20 per cent above the corresponding 1907 figures, were, however, almost 50 per cent below like shipments for the first quarter in 1906.

Eastbound trunk-line movements of provisions from Chicago and Chicago Junction points during the four weeks in March, 88,856 tons, were considerably below the February and March, 1908, movements, although about equal in volume to the March, 1907, movement. Figures for the thirteen weeks of the year, 301,084 tons, were below like figures for the first quarter of the preceding three years. The grain movement in March, 14,571,000 bushels, was heavier than for the preceding month as well as during March of the preceding three years. Like figures for the first quarter of the year, 42,524,000 bushels, were also in excess of figures for the corresponding periods during the last three years. The flour movement during the month, 716,500 barrels, likewise shows an increase over last month's figures, comparing equally favorably with like figures for March of the three preceding years. Figures for the first quarter of the year, 2,063,035 barrels, are in excess of the corresponding 1907 figures of 1,942,597 barrels, though slightly less than the 1906 figures of 2,064,973 barrels.

Grain receipts during March at fifteen primary markets, 65,410,171 bushels, while in excess of the unusually small February receipts, were considerably below the March, 1907, receipts of 72,289,547 bushels, the decrease being due to smaller receipts at Chicago, Minneapolis, St. Louis, Kansas City, Milwaukee, and Duluth, only partially compensated by larger receipts at the smaller markets such as Omaha, Peoria, Cincinnati, and Indianapolis. The total grain receipts were made up of 15,650,558 bushels of wheat, 21,301,005 bushels of corn, 23,678,270 bushels of oats, 3,967,992 bushels of barley, and 812,346 bushels of rye, besides 2,029,669 bushels of flaxseed, which, however, do not enter the above total of grain. With the exception of oats all classes of cereals showed lighter receipts than during March, 1907. Grain receipts at the same markets during the seven months of the crop season beginning September 1, 506,758,846 bushels, were below the corresponding 1907 and 1906 figures of 527,683,041 and 561,863,704 bushels, smaller receipts as compared with 1907 totals appearing under the heads of wheat, corn, and rye, while the receipts of oats and barley show slightly larger figures. Of the larger markets Chicago, and Duluth show slightly larger season receipts, while Kansas City, Minneapolis, St. Louis, and particularly Omaha, show smaller receipts than a year ago.

II.—DOMESTIC COMMERCE ON THE GREAT LAKES.

[For tables pertaining to this section see page 1752.]

Domestic shipments from all ports on the Great Lakes during the month aggregated 300,719 net tons, compared with 392,582 and 374,102 net tons reported for March, 1907 and 1906. The freight movement during the month, practically all of a local character between Lake Michigan ports, consisted mainly of coal, 68,157 net tons, compared with 103,685 net tons shipped during March, 1907, grain and flaxseed 1,155,791 bushels, compared with 2,532,359 bushels, flour 32,122 net tons, compared with 15,598 net tons, lumber 14,667,000

Digitized by Google

feet, compared with 24,790,000 feet, and miscellaneous merchandise 125,795 net tons, compared with 131,190 net tons shipped during March, 1907. While the Detroit River was open for navigation during part of the month, no freight movement for the river was reported. Three vessels of 3,546 net tons register constituted the northbound movement on the Detroit River and one vessel of 365 net tons register the southbound movement for the month. The total number of lake vessel clearances in the domestic trade during the month was 1,015 of 1,127,617 net tons register, compared with 1,181 vessels of 1,210,116 net tons register reported for March, 1907. Milwaukee shows the largest number of clearances for the month, 222 vessels of 268,633 net tons, Ludington with 172 vessels of 246,539 net tons, and Manitowoc, with 117 vessels of 146,896 net tons are the only other two ports showing over 100 clearances for the month.

III.—COMMERCIAL MOVEMENTS ON THE NORTH ATLANTIC SEABOARD.

[For tables pertaining to this section see page 1756.]

Live-stock receipts at the four principal Atlantic seacoast cities—Boston, New York, Philadelphia, and Baltimore—during the month, or four weeks ending March, aggregated 741,915 head, compared with 526,409 head received during the same period in 1907. Of the total receipts during the month at the four cities named, 419,688 head were hogs, 40,371 calves, 88,300 cattle, and 193,556 sheep. Receipts of all classes of animals were heavier than for March, 1907, the main increases being under the head of hogs and sheep. As the exports for the month of cattle, hogs, and sheep from the four cities named were relatively small and hardly larger than a year ago, the increased receipts indicate an increased consuming capacity at these cities, quite remarkable, in view of the prevailing industrial depression. Receipts during the first quarter of the year at these cities, 2,515,663 head, were over 40 per cent larger than the corresponding 1907 receipts, the largest increases, as in the case of monthly figures, appearing under the head of hogs and sheep.

Grain and flour receipts at the four mentioned cities for the month, 13,146,371 bushels, show a heavy decline as compared with March, 1907 and 1906, receipts of 22,553,762 and 17,834,889 bushels. Of the total given, Boston is credited with 1,792,431 bushels, New York with 6,491,520 bushels, Philadelphia with 2,420,772 bushels, and Baltimore with 2,441,648 bushels, all the cities, especially New York and Baltimore, showing heavy decreases as compared with corresponding 1907 receipts. The large shrinkage in the March receipts of corn at these four ports, 1,705,096 bushels, as against 10,198,870 bushels received during March, 1907, accounts to a large extent for the smaller total receipts, although wheat receipts as well show smaller aggregates than a year ago, 1,479,700 bushels, compared with 2,476,234 bushels. The flour receipts for the month, on the other hand, show a slight increase from 1,292,373 barrels for March, 1907, to 1,305,413 barrels for March, 1908. The aggregate grain receipts for the first quarter of the year at the four cities named, 49,740,021 bushels, likewise show a considerable decrease as compared with corresponding 1907 and 1906 figures of 62,997,769 bushels and 73,687,793 bushels, owing to the smaller receipts of wheat and, notably, corn. Exports of wheat for the first three months from the corresponding customs districts aggregated 9,361,862 bushels, compared with 6,942,766 bushels exported during the first quarter in 1907, while the corn exports during the same period, 11,592,355 bushels, show a shrinkage corresponding fully to that noted in the receipts. The exports of flour from these same four customs districts, 2,179,846 barrels, compare favorably with the 1907 exports of 1,610,045 barrels, thus leaving a corresponding smaller amount available for local consumption.

IV.—COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

[For tables pertaining to this section see page 1759.]

Coastwise receipts of southern pine at New York during the month ending March 25, 19,621,680 feet, were about 30 per cent below like receipts for the corresponding 1907 period. Figures for the first three months, 60,598,211 feet, show a similar shrinkage from the 96,648,011 feet reported last year, the principal losses occurring in the receipts from Savannah and Brunswick, Ga., Charleston, S. C., Jacksonville, Fla., and Wilmington, N. C.

Coastwise shipping arrivals at Boston during the month comprised 735 vessels of 804,245 gross tons, compared with 733 vessels of 757,693 gross tons reported for March, 1907. Of the total, 525 vessels of 618,953 gross tons are credited to southern ports and 210 vessels of 185,292 gross tons to eastern ports. Figures for the first quarter of the year comprised 1,956 vessels of 2,199,787 gross tons, compared with 1,933 vessels of 2,092,251 gross tons reported for the first quarter in 1907.

Reported coastwise arrivals at New York during the month comprised 389 vessels, of which 220 are credited to southern ports and 169 to eastern ports, the corresponding totals for 1907 and 1906 being 481 and 591 vessels, respectively. Figures for the first three months of the year comprised 1,026 vessels, of which 620 were reported from southern ports and 406 from eastern ports, the corresponding 1907 and 1906 totals being 1,250 and 1,415 vessels.

Arrivals in the coastwise trade at Philadelphia during the month numbered 390 vessels, compared with 336 vessels reported for March, 1907, while figures for the first quarter of the year, 879 vessels, were below the corresponding 1907 total of 917 vessels.

V.—COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY.

[For tables pertaining to this section see page 1762.]

Sight receipts of cotton for the seven months of the season beginning September 1, 9,928,065 bales, show a decrease of over 17 per cent compared with the 1907 season receipts, although being about half a million bales in excess of the 1906 figures. Port receipts during the same period aggregated 7,399,387 bales, compared with 8,978,376 bales and 6,721,472 bales for the corresponding periods of the 1907 and 1906 seasons. Receipts at 29 leading interior markets for the same period were 4,208,741 bales, compared with 6,385,518 bales and 4,732,470 bales during 1907 and 1906. American spinners' takings are stated as 2,955,439 bales, or about 30 per cent of the total sight receipts, while the corresponding percentages for the 1907 and 1906 seasons were 32 per cent and 37 per cent, respectively. Of the total takings, 54.7 per cent are credited to southern mills and only 45.3 per cent to northern, including Canadian, mills. Total American stocks held at the end of the month, 1,031,257 bales, were considerably below those held on corresponding dates in 1907 and 1906, 1,411,691 bales and 1,238,840 bales, respectively.

Receipts of rough rice at New Orleans during March aggregated 34,944 sacks, compared with 59,286 and 24,114 sacks received during March, 1907 and 1906. Receipts for the eight months of the season, 1,173,439 sacks, were slightly larger than the 1907 season receipts and 40 per cent in excess of the corresponding 1906 figures. Shipments of clean rice for the eight months of the season, 1,350,138 pockets, on the other hand, were below the corresponding shipments during the 1907 and 1906 seasons of 1,470,077 and 1,530,328 pockets.

Receipts of spirits of turpentine at Savannah, Ga., for the season ending March 31, are stated as 205,068 barrels, compared with 194,702 barrels and 206,269 barrels received during the seasons 1907 and 1906. Of the shipments for the season, 79,143 barrels were domestic shipments and 108,108 exports, making a total of 187,251 barrels, which is below the totals shipped during the two preceding seasons. As a

Digitized by Google

result stocks on hand at the end of the season showed the unusually large figure of 24,276 barrels, compared with 6,459 barrels and 1,642 barrels, the stocks remaining on hand at the end of the 1907 and 1906 seasons. Receipts of rosin during the season, 720,095 barrels, likewise exceeded the corresponding figures for 1907 and 1906, 665,102 and 702,654 barrels. Total season shipments aggregated 697,341 barrels, compared with 666,003 and 684,672 barrels for the 1907 and 1906 seasons. Of the total shipments slightly over one-half, viz, 357,295 barrels, were taken by domestic consumers. Stocks of rosin at the end of the season are stated as 65,170 barrels, compared with 42,416 and 43,317 barrels on the same dates in 1907 and 1906.

VI.—COMMERCIAL MOVEMENTS ON THE PACIFIC COAST.

[For tables pertaining to this section see page 1767.]

Shipments of redwood lumber from upper California during the month totaled 13,817,207 feet, compared with 37,827,957 feet and 32,673,090 feet reported for March, 1907 and 1906. The total shipments were destined as follows: San Francisco Bay, 7,889,301 feet, southern California, 3,372,261 feet, and other, including foreign destinations, 2,555,645 feet. Shipments for the first quarter of the year, 54,176,532 feet, were over 50 per cent below the corresponding 1907 figures, although the shipments to points outside the State, 12,862,852 feet, were considerably higher than during the first quarter in 1907.

Arrivals of pine and fir at California points during the month, 52,104,733 feet, were on a decreasing scale, compared not only with the March, 1907, arrivals of 143,089,927 feet, but also with like figures for the earlier months of the year. The figures for the first quarter of the year, 203,641,441 feet, were over 48 per cent less than the corresponding 1907 figures.

March receipts of flour and grain at San Francisco, 951,975 bushels, were below like receipts for the earlier months of the year, as well as March, 1907, receipts of 1,306,385 bushels, the main decreases occurring under the head of flour, barley, and oats. Figures for the first quarter of the year, 3,374,559 bushels, notwithstanding heavier wheat receipts, show a decline of almost a million bushels as compared with last year's figures. The heaviest decline is shown for barley, of which the greater part is exported.

Lumber shipments from Portland during the month, 9,170,561 feet, were lower than during the earlier months of the year and less than half the March, 1907, shipments. Shipments for the first quarter of the year, 38,682,509 feet, were over 12 million feet below the corresponding 1907 shipments, although the exports increased from 14,263,663 feet during the first quarter of 1907 to 25,734,059 feet during the first quarter of 1908.

Citrus fruit shipments from southern California during the month were 5,144 cars, of which 4,762 cars were oranges and 382 cars lemons; shipments for the five months of the crop season beginning November 1 aggregated 15,092 cars, of which 13,248 cars were oranges and 1,844 cars lemons. Corresponding figures for the 1906–7 and 1905–6 seasons were 12,244 cars and 13,859 cars.

VII.—COMMERCIAL MOVEMENTS ON RIVERS AND CANALS.

[For tables pertaining to this section see page 1771.]

Upstream traffic during March on the Monongahela River at Lock No. 1, representing the maximum upstream movement on that river comprised 73,758 tons, of which 39,172 tons were gravel, 21,586 tons sand, and 9,591 tons iron and steel products. The downstream traffic during the month at Lock No. 3, representing the maximum downstream movement on the river, 839,154 tons, was composed mainly of bituminous coal 824,800 tons, sand 9,517 tons, and iron and steel products 2,500 tons. Figures for the first quarter of the year show an upstream movement at Lock No. 1 of 208,853 tons, compared with 262,957 tons for the first quarter in 1907, and a downstream movement at Lock No. 3 of 2,282,882 tons, compared with 2,184,954 tons for the first quarter in 1907. It is interesting to note that the total bituminous coal movement on the river for the first quarter of the year, 2,252,000 tons, was larger than the corresponding movement in 1907, 2,154,400 tons.

River traffic in both directions by way of Davis Island Dam during the month, 331,336 tons, owing mainly to smaller coal movements, was lighter than a year ago. Figures for the first quarter of the year, 975,382 tons, compare favorably with the corresponding 1907 and 1906 figures of 754,839 and 717,473 tons.

The river movement at Cairo, Ill., numbered 879 vessels of 632,733 tons, compared with 670 vessels of 462,388 tons reported for March, 1907. Of the total stated, 607 vessels of 443,744 tons represented movements between points above and below Cairo and 272 vessels of 188,989 tons a local movement. Figures for the first quarter of the year comprised 2,273 vessels of 1,485,901 tons, compared with 1,592 vessels of 1,109,057 tons reported for the first quarter in 1907.

VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, AND PETROLEUM—PIG-IRON PRODUCTION.

[For tables pertaining to this section, see page 1773.]

Anthracite coal shipments from eastern producing territory for the month totaled 4,766,158 gross tons, being below the total reported for March of the preceding three years. Shipments for the first quarter of the year, 14,888,253 gross tons, are but slightly below the corresponding 1907 shipments of 15,049,480 gross tons, though about 7 per cent below the 1906 shipments.

Coal and coke traffic originating on the Pennsylvania Railroad Company's lines east of Pittsburg and Erie during the four weeks ending March 28, 3,754,663 net tons, show a considerable decrease as compared with March, 1907, figures of 4,531,916 net tons, the decline being due mainly to the heavy shrinkage of coke shipments and to a smaller extent, to the lighter shipments of anthracite and bituminous coal. The same remarks hold true of the figures for the first thirteen weeks of the year, 1,020,565 net tons, which are about 20 per cent below the corresponding 1907 figures. The decrease in the coke shipments amounts to about 50 per cent as compared with last year's figures. Like movements over seven leading eastern coal-carrying roads, including the Pennsylvania and Baltimore and Ohio lines, 9,581,447 tons, practically show the same rate of decrease. The total for the first quarter of the year, 26,258,086 tons, were about 21 per cent below the corresponding 1907 total, the decrease being largest in the case of coke, less so in the case of bituminous, and least in the case of anthracite coal.

The estimated coke production at Connellsville, including the lower district, during the four weeks ending March 28, 618,941 net tons, was 62 per cent below the corresponding 1907 figures, and 12 per cent below the February figures of 713,323 net tons. The number of idle ovens in the district reported on March 28, 21,936, exceeds by over 2,000 the number reported at the end of February. The number of cars used in shipping the product since the beginning of the year is stated as 82,218, compared with 190,611 cars used during the same period in 1907.

Production of anthracite and coke pig iron during the month, 1,228,204 gross tons, was about 1 million tons below the 1907 total. The daily average rate of output, 39,619 gross tons, indicates a further slight improvement in operations as compared with the February and January records of average daily output of 37,163 and 33,718 gross tons. Larger production figures, as compared with the Feb-

ruary returns, are reported from the Central West and Western districts, Alabama, the Shenango Valley district, western Pennsylvania, and the works in Maryland, Virginia, and Kentucky.

Runs of petroleum from wells tributary to the principal pipe lines in the Appalachian, Lima-Indiana, and Mid-Continent fields, during March aggregated 8,192,803 barrels. Gross stocks of reporting lines at the end of the month, 63,954,924 barrels, show a further increase since February, while regular deliveries to consumers are given as 7,445,358 barrels.

IX.—CHANGES IN OCEAN FREIGHT RATES.

[For tables pertaining to this section, see page 1778.]

Published ocean freight rates on grain shipments from New York and Boston to British ports show a further decline since last month and were, in some cases, below those quoted a year ago. New York and Boston rates on grain shipped to Hamburg ruled firmer than those quoted in March, 1907, although the New York grain rates for the month were below those reported earlier in the year. New Orleans grain rates for the month were lower than those quoted during February as well as a year ago. Rates on flour shipped from New York and Boston to British ports have declined considerably since the beginning of the year and are on about the same level as a year ago, while like rates to Hamburg have changed but little, remaining from 40 to 50 per cent higher than during March, 1907. New Orleans rates on cotton shipments to British as well as continental ports on the whole show a downward tendency and range somewhat lower than a year ago. New York and Baltimore rates on cotton for the month, on the other hand, ranged higher than during March, 1907, as well as during the earlier months of the year.

X.—CHANGES IN RAILROAD FREIGHT RATES.

[For tables pertaining to this section, see page 1779.]

Changes in railroad freight rates, announced by the Interstate Commerce Commission during the month of April, affect, among others, the domestic ex-lake rates on wheat, corn, and rye traffic from Buffalo and Erie to New York, Philadelphia, and Baltimore, which rates have been raised one-half cent per bushel, while the rates on eastward barley shipments from the same points have been raised one-fourth cent per bushel, these increases to become effective May 1. Slight modifications and readjustments of all-rail rates are to become effective on the same date on all-rail shipments of grain, flour, and grain products from Chicago and East St. Louis to the Atlantic seaboard. The lake and rail rates on shipments of grain, flour, and grain products from St. Paul and Duluth, Minn., to the Atlantic seaports in effect at the close of navigation in 1907 have been restored in anticipation of the opening of lake navigation. Export rates by lake and rail on glucose and other corn products, shipped from East St. Louis to the Atlantic seaboard, have been raised one-half cent per hundred pounds. Lake and rail rates from East St. Louis to the Atlantic seaports on wool in grease have been raised one-half cent per hundred pounds, the increase to go into force May 1.

COMPARISON OF CAR-SERVICE OPERATIONS.

A convenient index to the traffic activities of the country is found in the comparative figures of cars handled by the various car-service associations. Thirty-six different associations report monthly the number of cars handled in their respective territories. Only in a very rough way, however, do these figures indicate the changes in volume of traffic, inasmuch as they do not, in some cases, include more than one-third of the cars actually handled at a given traffic center, and the territory under control of an association may be extended or contracted from time to time. The figures are given, nevertheless, as a convenient general gauge of increase or decrease of traffic by rail, assuming that they are made up on substantially the same basis from year to year.

The number of cars handled by the above 36 car-service associations during the thirty-one days of March, 2,265,603 cars, while about 15 per cent below the total reported for March, 1907, indicates, however, a slight improvement in traffic operations compared with corresponding figures for either of the earlier months of the year, as can be seen from a comparison of the average daily number of cars handled during the first three months of the year, January, 66,903, February, 67,709, and March, 73,084 cars.

The American Railway Association, from reports of 158 roads, notes a decrease in the number of idle cars since last month, the total number for the entire country and Canada having decreased from 314,992 cars as per March 4, to 306,507 cars as per April 1. This decrease was not continuous, the figures for the 18th of March presenting a more favorable total for the country, viz, 297,042 cars. Nor has the improvement been uniform for the various sections of the country. Thus lines in New England, in the Southern Atlantic, the Central and Far Western States, as well as those in Canada, report a larger number of surplus cars than for the first week in March. The number

of idle coal, gondola, and hopper cars (used in the transportation of mine products mainly) reported for April 1, 120,669, is about 20,000 less than the number reported under date of March 4, the report for the middle of the month showing an even more favorable number, viz, 119,205 cars.

I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

The territory embraced in this section extends from Minneapolis, in the Northwest, to Little Rock, in the Southwest, east as far as Buffalo, and south as far as the Ohio River. Interior traffic movements for March and three months of succeeding years are shown by tables of live-stock receipts and shipments and comparative stocks of provisions at the most important packing-house centers; by tables of receipts and shipments of flour, grain, produce, and merchandise, and by trunk-line shipments of flour, grain, and provisions from Chicago. During the season of canal navigation, canal and rail traffic in grain, flour, and general merchandise at Buffalo is given under this section. Ohio River traffic is reported under Section VII—Commercial movements on rivers and canals.

WESTERN LIVE-STOCK MOVEMENT.

This movement includes receipts and shipments for March and three months at important interior markets for three successive years. For receipts of live stock at other markets, whose operations are reported in this issue, reference should be made to the general trade movement of these sections.

GRAIN MOVEMENTS FOR CROP PERIODS.

In the following table an attempt is made to present grain movements at interior primary markets in such a manner as to permit of an intelligent study of the effect of each year's production upon such movements. While it is recognized that it would be impossible to present in a single table accurate crop-year periods for each grain, owing to the appreciable difference in time of the maturing and harvesting of the different cereals, it is nevertheless believed that a given period may be used which, although both over and under lapping in certain instances, is comprehensive enough to answer all practical purposes, especially where figures representing movements for cumulative periods of two or more months are employed. To make possible, therefore, the presentation of such information in a single table, September 1 has been decided upon as the fairest arbitrary date on which such statements should begin.

II.—DOMESTIC COMMERCE ON THE GREAT LAKES.

The traffic taken account of in the following tables, except where otherwise specified, is coastwise traffic only, and is confined strictly to commerce between domestic ports during the month of March and three months ending with March. Unless otherwise credited, the statistics of domestic commerce reported herewith are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

During the month of March transactions at 21 ports of receipt and 29 ports of shipment were reported. The number of vessels arriving in March was 993 and the clearances numbered 1,015 vessels. The registered tonnage for the month was as follows: Arrivals, 1,111,473 net tons; clearances, 1,127,617 net tons. This total does not include the tonnage of vessels engaged in trade between the United States and Canada.

SUMMARY OF DOMESTIC LAKE TRAFFIC, MARCH AND THREE MONTHS ENDING MARCH, 1906–1908.

A summary of the lake traffic for March, compared with the corresponding months in 1906 and 1907, is given in the following table. The various quantities and units of freight are reduced to their equivalents in net tons. March receipts in 1908 at all ports reporting were 283,628 net tons, compared with 352,010 net tons in March, 1907, and 377,822 net tons in March, 1906. The figures of shipments of coal include coal loaded for vessels' fuel consumption.

IV.—COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

The scope of commercial movements represented in this section usually includes receipts and shipments of merchandise between New York and New England ports, giving the bulk of the water-borne trade of nine of these ports with New York; coal shipments by water from New York, Philadelphia, Baltimore, Norfolk, and Newport News to seaboard points north and south; coastwise receipts of southern pine and eastern spruce, by cargoes, at New York from sources of origin, and coastwise and foreign shipping movements at Boston, New York, Philadelphia, Mobile, Galveston, Port Arthur, and Sabine Pass. Coastwise coal shipments from New York, Philadelphia, Baltimore, Newport News, and Norfolk are also presented. Coastwise shipments of petroleum from Texas producing territory to Atlantic and Gulf ports are given in Section VIII. Representative freight rates quoted to leading destinations on the eastern and southern coasts are shown in Section IX.

COAL SHIPMENTS BY WATER FROM NEW YORK, PHILADELPHIA, BALTIMORE, NEWPORT NEWS, NORFOLK.

Through the courtesy and cooperation of nearly all of the more prominent shippers of coal by water from the middle Atlantic ports of New York, Philadelphia, Baltimore, Newport News, and Norfolk to Atlantic, Gulf, and Pacific coast ports, the following figures of the coastwise coal movement have been obtained. These statistics cover probably more than 90 per cent of the shipments for the places and periods mentioned, and include both anthracite and bituminous coal. Anthracite coal is shipped principally from New York Harbor wharves. From Philadelphia shipments are primarily bituminous and secondarily anthracite. From Baltimore, Newport News, and Norfolk shipments are almost wholly bituminous. During March vessels were supplied with fuel at these five ports to the amount of 275,651 tons.

During March 70 collectors of customs report 631,629 gross tons of coal loaded on vessels for fueling purposes on the Atlantic, Gulf, and Pacific coasts. Of this total, 152,436 tons were placed on board vessels destined to domestic ports and 479,193 tons on foreign-bound vessels. The total value of this tonnage was reported as being $2,277,001, an average of about $3.60 per ton.

Moreover, 1,638 gross tons of bunker coal were placed on lake vessels in the foreign trade during the month of March, 1908.

V.—COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY.

The territory covered in this section includes that lying south of the Potomac and Ohio rivers and east of the Mississippi River and that portion west of the Mississippi included in the States of Louisiana, Oklahoma, and Texas. The characteristic traffic movements are those of cotton, lumber, naval stores, and general commodities.

Cotton-trade reports include the statement of the quantity of the crop brought into sight and its disposition, during successive crop years, to the end of August. Other articles of traffic reported are the grain and rice movements at New Orleans, shipments of yellow pine from the Southwest and from Virginia and the Carolinas to destinations, and river and rail traffic at Louisville, Ky., and Little Rock, Ark. Southern river trade is given in Section VII, southern coastwise shipments under Section IV.

SOUTHERN COTTON MOVEMENT.

According to the practice of the New Orleans Cotton Exchange, whose official figures are used, except when otherwise specified, the amount of cotton brought into sight from month to month during the season includes (1) receipts from plantations at ports; (2) receipts at the overland points of crossing on the Mississippi, Ohio, and Potomac rivers for shipment direct to northern and eastern mills; and (3) takings by southern mills. To this must be added (4) stocks left over at the end of the year at ports and interior towns. These four items together give the total commercial supply available for distribution.

VI.—COMMERCIAL MOVEMENTS ON THE PACIFIC COAST.

Traffic operations reported in this territory consist mainly of receipts from productive areas on the Pacific slope at seaboard ports of outlet, of coastwise movements between the upper and the lower Pacific coasts, and of overland shipments to the East. The operations usually reported include receipts and shipments of merchandise at San Francisco; redwood lumber shipments from upper California; arrivals of redwood, pine, and fir at California coast points; lumber shipments from principal mills reporting in Washington; commerce at the ports of Portland, Seattle, and Tacoma, and the shipments of citrus fruit from southern California.

Unless otherwise specified, the data out of which the following tables are constructed are derived from monthly reports received from the engineers in charge of river and harbor improvements under the auspices of the War Department.

Upstream tonnage on the Muskingum River during March, 1908, was largest at Lock No. 3, where 530 tons of freight passed, of which 9 tons were lumber and 521 tons miscellaneous merchandise. Downstream tonnage was largest at Lock No. 3, where 1,022 tons of freight passed, mostly merchandise. The grand total freight passing in both directions at locks of maximum tonnage was 1,552 tons.

Rough River, Lock No. 1, was submerged from the 7th to 15th, inclusive dates, sufficient to allow traffic to pass without locking.

VESSEL MOVEMENT ON THE MISSISSIPPI AND OHIO RIVERS VIA CAIRO, ILL.

The following table is compiled from monthly reports received from Cairo, Ill., giving the number and tonnage of vessels passing or having their termini there. The tonnage of boats and barges is estimated tonnage. The tonnage of steamboats is actual.

The total through movement represents vessels passing Cairo to or from points on the Ohio, Mississippi, and other rivers. The local movement at Cairo represents vessels having Cairo as one of their termini. (The monthly reports of arrivals and clearances are made by Mr. George Parsons, trustee of Cairo trust property, who is intimately acquainted with river operations at this point.)

For the three months ending March 31, 1908, of the vessels reported, 656 were loaded with coal; 209 carried lumber, logs, piling, and wood; 28 carried ties; 120 carried merchandise; 5, rocks; 14, corn; 31, manufactured iron; 6, molasses, and 3, sugar.

TRAFFIC ON THE MONONGAHELA RIVER.

The iron and steel products passing Lock No. 1 represent practically the entire river traffic of these products. The coal passing downstream through Lock No. 3, plus 65,594 tons mined in the first and second pools during March, makes a total coal traffic of 890,394 tons for the river during March. Of other downstream freight, 14,354 tons of miscellaneous merchandise are to be added, making a total of 904,748 tons in March. Lock No. 3 represents approximately the general aggregate of down-river tonnage.

For three months ending with March the total movement was 2,723,353 tons in 1908, 2,619,285 tons in 1907, and 2,887,702 tons in 1906. Of upstream freight, that passing through Lock No. 1 represents approximately the general movement in this direction. The freight passing this point in March amounted to 73,758 tons.

The total freight moved in both directions, on this basis of calculation, was 978,506 tons in March, 1908, as against 959,245 tons in March, 1907, and 1,137,303 tons in March, 1906.

VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, AND PETROLEUM—PRODUCTION OF PIG IRON.

The series of tables following present some of the leading traffic operations in domestic coal, coke, and petroleum; also figures of pig-iron production by principal districts. They include shipments of anthracite coal from the anthracite regions, anthracite and bituminous coal and coke traffic originating east of Pittsburg and Erie on the Pennsylvania Railroad system, coal and coke shipments over the Baltimore and Ohio Railroad, the Chesapeake and Ohio Railway, the Norfolk and Western Railroad, and other eastern roads, weekly Connellsville coke output and shipments, and St. Louis receipts of coal. Petroleum statistics are included for the pipe-line territory in the Appalachian, Lima-Indiana, and Midcontinent fields. Statistics of pig-iron production cover the principal producing districts, and are exclusive of small quantities of charcoal iron. For coastwise coal trade generally, see Section IV; for Lake trade, Section II.

STATEMENT OF PIPE LINES IN APPALACHIAN, LIMA-INDIANA, AND MIDCONTINENT FIELDS.

The following table shows the business of the principal petroleum pipe lines in the Appalachian, Lima-Indiana, and Midcontinent fields. The Appalachian field includes Pennsylvania, New York, West Virginia, southeastern Ohio, Kentucky, and Tennessee. The Lima-Indiana field includes northwestern Ohio, Indiana, and the productions in Illinois. The Midcontinent field includes Kansas and Oklahoma.

The pipe lines which report no runs from wells receive their oil through other pipe lines. The regular deliveries represent deliveries to refineries and for export, and do not include deliveries to other pipe lines. The runs from wells represent Appalachian oil exclusively in all cases except three, namely: The Buckeye, which receives Appalachian crude from southeastern Ohio and Lima-Indiana crude from northwestern Ohio; the Indiana Pipe Line Company, which receives crude from Indiana and Illinois, and the Prairie Oil and Gas Company, which operates in the Midcontinent field.

Prior to August, 1906, the Buckeye pipe line reported separately its Appalachian crude, and its Lima-Indiana crude was reported jointly with that of the Indiana pipe line. Also, prior to this date, the pipe lines distinguished deliveries and net stocks of Appalachian oil from those of Lima-Indiana oil, but at present the deliveries and stocks of several of the companies reported in the following table include both kinds of crude oil.

Net stocks, often called liabilities, represent the amount of oil for which the pipe lines have receipted to producers and which they are liable for. In addition, the pipe lines hold a certain amount of sediment and surplus oil which, combined with net stocks, constitute gross stocks.

X.—CHANGES IN RAILROAD FREIGHT RATES.

Changes in railroad freight rates are obtained through the courtesy of the Interstate Commerce Commission, the auditor of that body transmitting them on the latest date which will permit of their insertion in the Summary. In this manner their publication is assured as soon after their receipt as possible, and as a rule they cover a period nearly a month later than that represented by other statements throughout this report.

The matter of deciding what changes shall be considered of enough importance to be presented is left entirely to the discretion of the Commission, all tables which they submit being published without reservation of any kind. This, however, must not be taken to indicate that all important changes are included, as such a presentation would be a practical impossibility, owing to the great number of tariffs to be examined and the short time in which to procure the rates therefrom.
